

SPANISH STUDENTS QUESTIONNAIRE

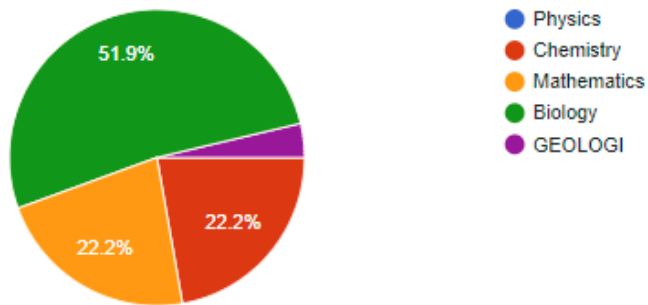

1 Is there a science lab in your school?

27 responses

2.- What is you favourite science topic?

27 responses

3.- Why is it your favourite one?

22 responses

It is my favourite one because I like nature and all what have to see with animals.
Because for me is very interesting
Because i love geoligi
Because I like to know how the body works
Because I like biology classes
Mathematics is my favourite because i don't like the others.
Because i like nature
Mathematics is my favourite one because is funny and i don't like the others.
Because I like to do things in the laboratory.
because experiments are made
Because I love the animals
Because it's easy to study

Because is easy to understand and because I like it

Because in biology, you can learn a lot of things about your body or nature, for example.

Because I like nature

It is my favourite one because I like things that are related with body and I think that kind of things can be useful to ordinary life.

I'm really good at math

Mathematics is my favourite science topic because I like working with numbers and solving logical problems.

Because we usually go to the laboratory

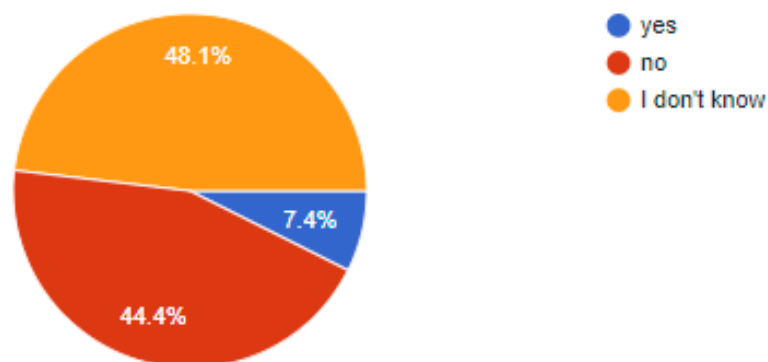

Because I have a good time doing exercises of that subject. I have to take account of all the things I've studied and use the logic.

It's my favourite one because it is the science that studies the composition of the atoms, elements, molecules and the structure and properties of matter.

Do experiments is my favourite one.

4.- Are you planning to get a degree for a scientific job when you grow up?

27 responses

5.- Why or why not?

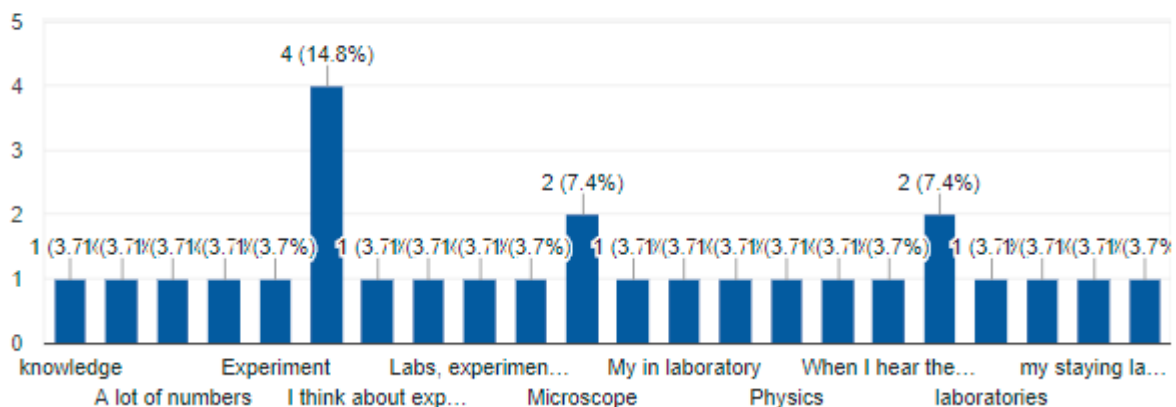

18 responses

Because i don't think in it.
So difficult
Because I want to be police man
No I don't, because I don't like this works.
Because I don't like it
No i don't because i don't like scientific works.
Because I don't like it.
because I don't like
I don't know because I probably won't study sciences.
because I know what I want to be in the future
Because, I prefer work in other things.
I don't like science
I want to be a nurse, I'm not sure if it is a scientific job but as it is related with body I put "Yes" in the previous question.
Because my father is an electronic engineer and i want to do that job too
I'm not sure because I like science, but I don't know if it will be what I will enjoy the most in the future.
I still don't know what I want to do in the future
I would get a degree for a scientific job because I would like to work in a lab and do experiments to see how to do a medicine or I would work in a hospital because I am interested in biology. But I wouldn't get it because it's hard to understand all the theory and I would get tired of studing in most of the cases.

6.- What first comes to your mind when you hear the word "science"?

27 responses

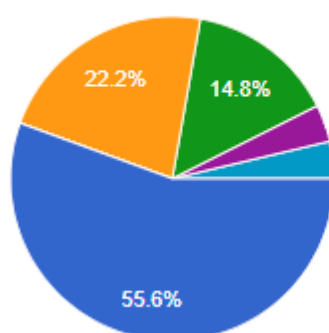

7.- Why?

14 responses

because i see it in the tv when i was young.
Because scientifics use them when they are doing experiments
I think in Experiments ecause science is undergo with experiments
because is related to that
Because I think that the Mathematics are the most important thing about the science
Because I think it is necessary to observe small things
I don't know
Because, many things that we can learn in science, we can do it with logic.
Because in films, we see scientists making experiments in labs since we are children and I know some names because my family tell me a lot of times.
Because he works in a lot of documentaries
Because whenever you discover something is something new and science is always discovering new things
Because animals is what we study the first in the school and in my opinion, experiments and medicine are the most important things for the society when we talk about science.
I think on that, because it helps in the advance of our society.
Because I connect this word with them.

8.- What do you think of time travel and time manipulation?

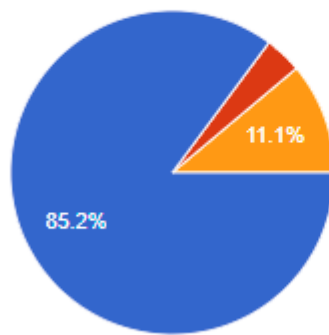

27 responses

- I think it is part of our future
- It frightens me
- I think it will never be possible
- I don't care at all
- I care in time travel but only in a half, I think that it is going to be possible to travel to the future but no to the past.
- I can't imagine how it would be because in this moment I think it is impossible, but science will continu...

9.- Do you like making experiments?

27 responses

- Yes
- No
- I have never done any experiments
- I don't care about it

10. - Why do you like that?

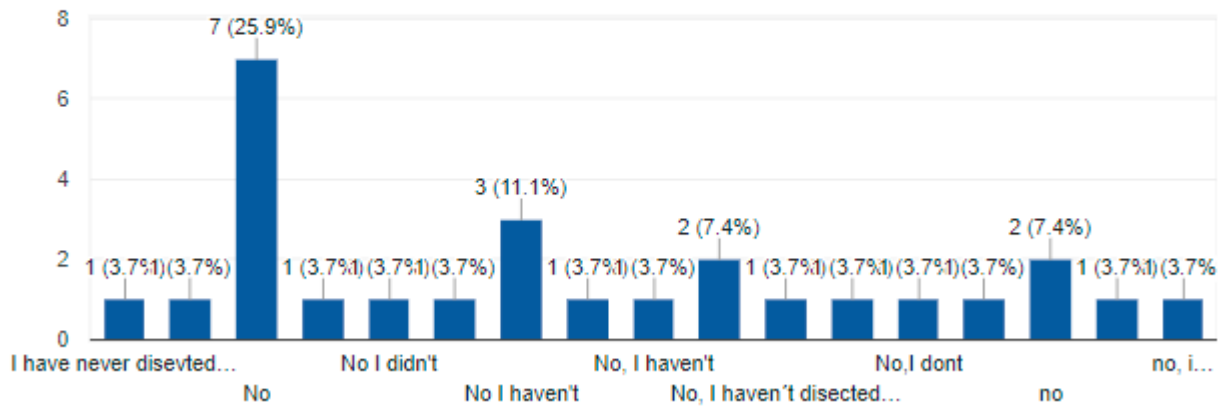

19 responses

because you miss class
Because is interesting
Because I thing is a different way of learning and working.
Because is interesting learn new thinks
because you learn some things
Because Is interesting activities.
Because are interesting activities.
because is fun put together different things
Because I love it since i was a child
Because is funny
Because its makes me interesting
Because, it's funny, but at the same time interesting.
I like it because when I do experiments I feel like films scientists, excited to see the results.
I can see in real life the thing i study
I like it because it is a different way to learn science, and you can see directly what is happening instead of studying it from a book.
I like how things react to experience
Because I can see that it's true what I've studied and it's important for knowing how to avoid diseases and that can help people.
I like that because it is something interesting and doing this I can see what is the result.
Because is very funny and you learn a lot.

11.- Have you already dissected animals? If yes, which ones?

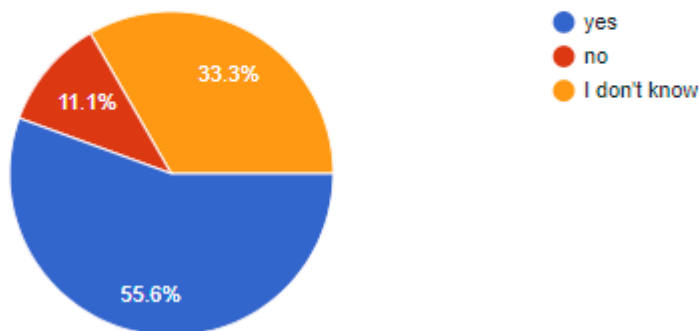

27 responses

12.- Do you think artificial intelligence may, at some point, become dangerous to humans?

27 responses

13. - Why do you think so?

16 responses

- because we ar going to be very lasy to do things
- Because robotic humans could be infected by a virus and to turn against us.
- i dont know but i have a bad feeling
- because i see in films
- because is logical and inevitable.
- Because I dont know what means that
- Yes they can be dangerous
- Because I don't know their reactions and they can be dangerous.
- because hook us

Because I think that this intelligence is our future

I don't know

Because, artificial intelligence help humans on many things and for this reason I don't think that the artificial intelligence will become dangerous.

I'm not sure.

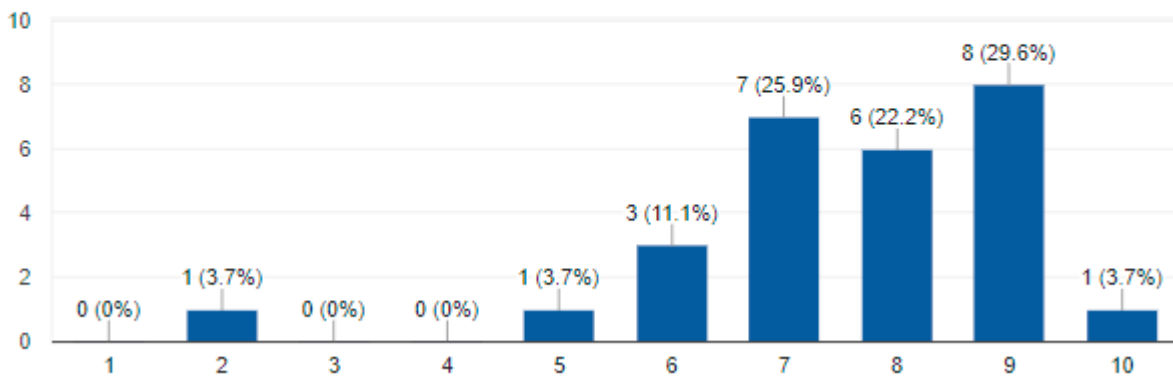

I believe that since artificial intelligence is not perfect and could do us harm

Because, for example, the artificial intelligence of some machines are destroying workstations because that's cheaper and in the future some people could use too much machines and not interact with real people.

I think so because some day, they can give us incorrect information. For example: the computer.

14.- Do you think science is useful in our everyday life?

27 responses

15. - If you can, give an example or explain why/why not.

14 responses

We use science when cooking, for example, using reactions between different savours.

to learn as a sponge cake up.

For example when I am cooking

Science is important because we gwt many things with them.

I think that science is important because we get many things with them.

because if there was no science we wouldn't have nothing

Because we need it to going shopping(mathematics for example)

Science is useful in everyday life, for examplo, when we buy anything.

For example, when you have to calculate how much money the dependient have to give you, you have to use mathematics.

I do parkour and physics helps me a lot

Thanks to science we have discovered things that without science we would never have found

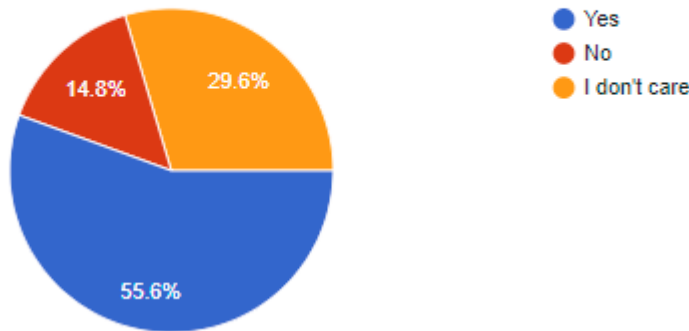

When we want to buy something we have to count our money or when we are ill we take a medicine to feel better.

It helps us to have medicines that cure our illnesses.

For example it investigates many illness and people who investigate look for medications.

16.- Do you like science?

27 responses

17. - Why do you like/dislike it?

13 responses

because is so interesting

Because it is not important to me.

because is important

Because it is necessary

Because for one part is funny do experiments

Because, in my opinion it is very interesting and it is useful for our lifes.

I like it because is interesting and very useful, you learn a lot of things with that and also you discover some misteries.

I think It is interesting

I like it because I think it's very interesting and it helps us to understand nearly everything that happens around us.

Because you discover new things

Because I'm interested on how the body works and I like doing mathematical operations.

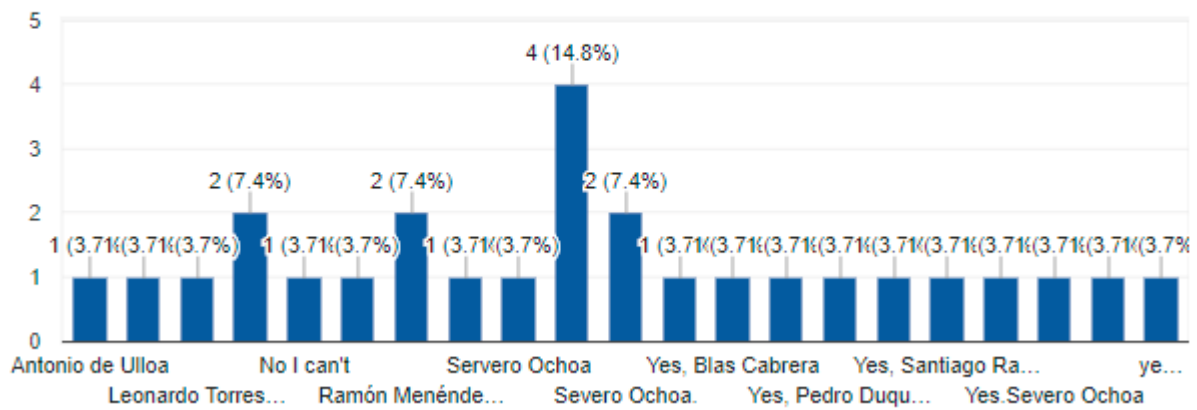

I like it because science help us in our day. Making things better and easier.

Because is very useful and if we don't have in the world is going to be a disaster.

21.- Can you name any Spanish scientists? If yes, give one name

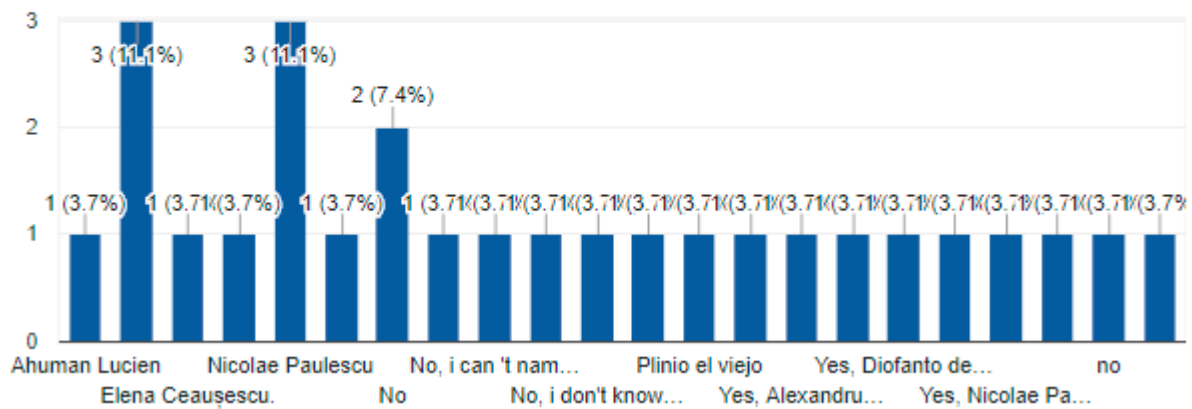

27 responses

22.- Can you name any Romanian scientists? If yes, give one name

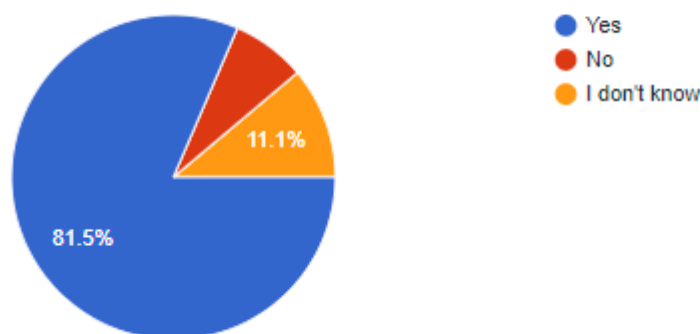

27 responses

23.- Do you think this is a good project? Will it help you improve your English scientific vocabulary?

27 responses

24.- If you want, explain your previous answer :

11 responses

Because is interesting to communicate whit other person

Yes, I think so, because we are writting about science and we need to know some vocabulary about this theme.

Because are some things tjat i don' t know and after do this cuestionari know it.

Because you read, speak and generaly improve your english

Yes it is. Because, with this project we can learn many things.

I don't know if that project is good because it is to early, but I'm sure that it is a good option to improve my vocabulary.

I think it will help us improve our English because we can learn vocabulary from other people, or it can encourage us to make researches and know more about the topic.

In my opinion if you learn English since you have to know how to answer each question in the questionnaire

We have to explain a lot of things and when we don't know a word in english we search it. We are a lot of people and we have studied different, so it's possible that we know some words that others don't and the other way around.

I think this is a good project because we can improve our English and express our opinions.

It is good for improve and learn more english and also to learn new words.
