

**INTERVIEW I** by Stergios Margiolas – **GREECE**

**MIT TEN**

**Topic:Raising intercultural understanding**

***Mentor:Marian Luca***

**1. What do you think intercultural understanding means?**

It has to do with adopting foreign elements in our own national civilization/culture.

**2. Have you ever bothered to get informed about other cultures? If yes, for which one?**

Yes, for the Roman one by visiting the country itself and its monuments.

**3. Do you believe it is a way for people to come closer and to promote understanding among different cultures? Are there other ways? Which ones?**

Of course it is a way for people to come closer with the right approach. Some other ways to promote intercultural understanding are visits and online studying.

**4. Could some habits of other people and cultures become part of your everyday life?**

By all means if that is possible and they can be absorbed by our own culture.

**5. Are you in favor or against it and for which reason?**

I'm only in favor as the understanding of the uniqueness of each culture may lead to the widening of spiritual horizons of the human being, the mutual respect and the increase of his universal conscience.
