

For me it was or is still the best I have ever experienced, because this project was full of turmoil and emotions. I believe that I speak on behalf of everyone when I say, that this project is something unique and wonderful, because just the 2 weeks in Germany were something extremely indescribable. That is why it is difficult for me to choose words and sentences correctly. In addition, some prejudices of the people from these countries were big, sometimes good but also bad and that was very wrong to think, because all of these people are wonderful and all great in their own way.

The projects and the tasks, that we got from these students/teachers and that we as students were allowed to distribute/explain were always something nice and very varied. The big church in Patras or the BMW center in Munich as well as the sea in Greece were all very beautiful experiences that I would do with all these students / some now also friends immediately again and would experience without thinking about it. I myself could connect some good friendships and that's why I find this project so unique. I could take with me some good experiences as well. I also hope that we can convey a lot to the other students during their visit in Germany and brought a lot of fun with them.

However, I liked the stay in Greece the most and the people who were present as well as the experiences/excursions. And yes I would see this project as an enrichment for my life, because it was indescribably wonderful to fly with friends/classmates and to go on such adventures/excursions and to go on such adventures/excursions and to get to know each other, because we did not always get along with each other before and these weeks were something new and helped a lot in my opinion.

Also in Greece I could experience a lot of new things and I was impressed by a lot of things there. And to say it all again briefly, that project was wonderful, with all these students and teachers, as well as the excursions and yes even the bus trips. I can and probably all can say that we are lucky that this project exists as an opportunity at our school and also many thanks to Mrs. Zelenko.

Many thanks all the other teachers who have continued and built up this project. I would want to do it again at once. It was wonderful <3. THANK YOU. :)
