

How covid-19 quarantine affected our lives?

I'm fine

Expectation vs reality

Positives and negatives

Positives:

Free time

Stay at home

No study

Get up at 12 o'clock

Very close to fridge

Negatives:

everything close

can't go outside

help at home (none wants to)

wearing a mask

can't meet with friends

we can't go out with friends

Changes in lives

„My routine after the covid outbreak has not changed a lot, except that now I spend all day at home and I have online lessons. The positive change was that I am at home now and do not have to get up early to get to school. The more difficult change was breaking up with friends and not being able to spend time together because we live far from home. I think I'm breaking up with my friend because even though we see each other in online lessons it's not the same as in school.”

Małgosia

„Before the pandemic I often went out with my friends, we met each other in bigger groups. We spent a lot time outdoor, now we stay indoor all the time and I don't meet new people often than now.”

Daniel

„For me nothing changed at all. I stayed at home before. The Biggest change to me was online lessons but now it's better than going to school every day. Beacuse of restriction I can't do some stuff beacuse almost everything is closed.”
