

# SOCIAL MEDIA

### Private Mie B Well being

#### WE ALL SPEND MANY HOURS ON SOCIAL MEDIA EVERY DAY, BUT DO YOU KNOW HOW DANGEROUS IT IS? LET'S TALK ABOUT THE DANGERS OF PRIVACY ON SOCIAL MEDIA

Bad things about privacy on social media are:
We share personal information to thousands of strangers without realizing it.

 On the Internet there is a digital footprint that is impossible to erase, there are comments or images that can take us to lose our job.

 Providing information such as the real name, phone or ID is a big mistake, because it could lead to an identity supplanting.

- Bank data should never be given to anyone, if you do it you could put your money at risk.
- You have to be very careful with what kind of photographs are sent and where they are published.

It would not be the first time that someone extort other person with sexual photos about him. Another case is that you can lose your job by compromised photos.

- There are lots of dangers of privacy on social media, but there are also a couple of good parts like:
- If something good or bad happens to us we can talk about it on our social media. That way someone else can learn from our mistakes.
- If we are open in social media we can find internet friends with this same taste of music, films, series, etc.
   They can be even from the other side of the world!
- If for example, a blind person brings her life into social media they can tell us how to behave over them. Thanks to that we can actually help them than make things even worse.
- If we are in a bad financial situation we can talk about it in our social media. We can find help from people like donation or advice.

# DO YOUREALLY HAVEA PRIVATELISE ONLINE?

#### WEINVITE YOU TO WATCH A SHORT FILM ON THIS SUBJECT

## Education.

#### SOCIAL MEDIA CAN INFLUENCE IN OUR EDUCATION TOO.

There are many bad sides about social media in our educaction:

-Students may spend their time on social media sites while studying, and due to this their concentration level reduces, so they end up getting low grades.

-Students have many ways to communicate between them, by social sites, to do the work, so they don't have to socialize, and this could lead to not knowing how to do it.

-Since students have to use social media to works and study, they spend a lot of time on it, because they use it on their free time too. This has many phisical and psicological negative effects, for instance, they could feel unmotivated to contact to people in person.

- Social media doesn't help to reduce the harassment in education. Indeed, teenagers tend to be more agressive and malicious with their comrades behind their screens. They know that anyone but their "victim" would see it, so they dare to be nasty. Moreover, they don't think about the consequences of their words on people's life.

# GOOD SIDES OF THE SOCIAL MEDIA im education

The internet has allowed students to be in constant touch with their teachers or with other fellow classmates with the help of social media, messaging apps and chat forums. Parents can interact as well as communicate with teachers and school authorities about their kid's performance in the school. Interaction with the like minded people on forums can help students to explore new ideas and enrich their knowledge.

# EFFECTIVE TEACHING AND LEARNING TOOL

The Internet has become a major tool for effective teaching as well as a learning tool.

Teachers can use it as a teaching tool by posting their teaching materials (notes and videos) on school website or forum. The learning process becomes interesting and diverse with the use of tutorial videos and notes. Teachers can teach with the use of animations, power slides and images to capture the students' attention.

#### 

In the future, we will certainly know how to use social networks well, much better than today. We can use them more safely, and all generations will be used to using them.

We can use them in some very practical actions, and in all the issues that concern us in the future.

Awareness-raising can be done through social networks, concerning ecology for example, a very important issue.
