

USE OF SOCIAL MEDIA IN EUROPE

PRIVATE LIFE AND WELL BEING (Spain)

PROS

I think that is a very easy way to talk to those people that are far away from you, I mean, In my case I have some relatives living in a different city, and now that we can't move out from here, we can do meetings to talk.

CONS

I think that it can be dangerous, because someone can steal your information or pictures and then he can put them on the net. For example someone takes a photo about himself, and if a person sees that photo, then he can upload on the network without your permission.

PRIVATE LIFE AND WELL BEING

(Germany)

PROS

- You can talk to your friends without going out
- You can find new friends-You can date people online
- You stay updated-We can chat and get into contact with people all over the world, especially when our friends are far away
- You can share funny things, your memories and pictures
- You can meet people from other countries and chat with them

CONS

- Someone can use your pictures for fake accounts
- It can be bad for your health when you stay online all day-Friendships could be ruined because people do not pay attention to other
- You could be bullied by others-You can get addicted
- You may think badly about a friend when he or she doesn't answer directly even though he/she had a sincere reason

PRIVATE LIFE AND WELL BEING

(Poland)

PROS

- you can see your friends and talk to them by facecam
- you can meet people from around the world
- you can date people on dating sites
- you can post stuff you want
- you can express yourself

CONS

- you can get bullied
- someone can make fun of you
- you can get hacked
- someone can make fake accounts
- you can get addicted to social media
- it could be bad for your health (eyes for example)

PRIVATE LIFE AND WELL BEING

(France)

PROS

-It allows people to keep chatting and have contacts during the quarantines for example

-You can talk and see family members who are far from home

-It is enjoyable to talk with your friends or to look at what you want during your free time

CONS

-Social Media are really addictive and can make you loose too much time

-The cyberharassment can ruin a life

-Friendships can be fragilised only because a friend don't answer you or behave badly on social medias

-Everything that you say or post can be remembered which can be used against you (Cyberharassment, job ...)

FOR EDUCATION/SCHOOL

(Spain)

PROS

You don't need so much materials since you have digital books and apps in one device. Here for example we use classroom or drive to send most of the homeworks and sometimes to do some exams, and it is faster. And in the future we won't have to carry anything else than the computer.

CONS

Sometimes when you have a timetable to send homeworks and when you don't have connection or Wifi you cannot send properly the homeworks or in the middle of the exam you can lose time if you have to start again. And in this case, in the future, maybe it could be a problem if we are not able to do things as we want and could be a waste of time.

FOR EDUCATION/SCHOOL

(Germany)

PROS

- YOU CAN GET INFORMATION AND LEARN ABOUT NEW THINGS
- YOU CAN ORGANISE YOUR WORK AND EXCHANGE INFORMATION WITH YOUR TEACHER OR CLASSMATES
- YOU CAN USE IT FOR DISTANCE LEARNING
- YOU CAN FORM STUDY GROUPS

CONS

- There can be technical problems
- You can come across fake news and it's hard to distinguish between fake or not
- You can lose your concentration
- You are less focused
- No genuine face to face interaction
- No social or personal contact

FOR EDUCATION/SCHOOL

(Poland)

PROS

Online education is pretty good because we can meet easier on lesson it means if we are probably sick don't have to move our homes. Another good thing is a simpler way to send homeworks because sometimes the application sends notification about it.

CONS

Someone can hack our accounts and stole our work or enter lesson. Also big problem is in internet connection in can be unstable. School friendships they can fall apart . In the future can have problems with comunication except social media because we can't socialize normally.

FOR EDUCATION/SCHOOL

(France)

PROS

You can use social media to have access to homeworks easily, you can contact your teachers or classmates, you have access to all the informations you need in case of, you only need to have a computer and nothing else. Some people just find easier or are more comfortable with the use of a computer or any electronic device, and it can increase their learningship.

CONS

You can have technical problems, like your Wi-Fi, your computer not working, etc. You can also get distract by all the notifications and messages from your social media. You can learn wrong things (fake news). Also, for some people, not being in a face-to-face relation and only in front of your computer can be problematic and the perso could feel anxious and struggling to learn like in regular class

IMPACT ON OUR FUTURE AND USE OF THEM

(Spain)

PROS

We can take information from them and then use it to get ideas for what I want to do in the future. And for the future you could be able to search for some information without any effort, only surfing the internet and you will get any kind of information from different pages.

CONS

It can be dangerous because if one day when you are a teenage, if you did something bad in the past, it will be saved forever and it can be a problem to apply for a job. And then you can be talking with someone that you think you know him/she and then it is just an identity theft. So we must be careful of what use we give to them

IMPACT ON OUR FUTURE AND USE OF THEM

(Germany)

PROS

- If you start something meaningful on social media your future employer will see it and may be impressed
- Positive digital reputation you can display your competence in new technologies
- Self-improvement in the use of new technologies

CONS

- Your future boss could see what you have posted on the internet when you were young
- Other coworkers may bully you because of your previous post
- Even when you changed our attitude towards certain things, people won't believe you

IMPACT ON OUR FUTURE AND USE OF THEM

PROS

We can learn a lot of useful information from social media, we can meet different people who can help us with something and we can develop our abilities. We can contact with our friends by not moving from our homes and we can also easily search some informations we need so we can learn faster.

(Poland)

CONS

We have to be careful with this what we sharing in social media, because in future our employer can check this and we may not get a job. Someone can make fun of pictures you send on social media and you need to be careful about who are you contacting with, it could be an old man for example, you never know.

IMPACT ON OUR FUTURE AND USE OF THEM

PROS

I think social media will help us because we are in a world of travelling and moving, so to keep in contact with our close family and friends. It will also be beneficial to study and avoid meetings which need hours of plane. It's a simple solution for many problems and globally very accessible. Though, you can also earn a living through social media.

(France)

CONS

However we have to be careful, because it can be dangerous, fake information can be told. It can also be negative for your future career, because your employer may 'discover' your social media and if you have anything which is frowned upon you could be reprobate.

Conclusion - are we so different?

No we aren't so different because we all use the same social media platforms, even if there might be slight differences and we all have the same problems and worries about it
