

In Ivanka pri Dunaji the Black Death started in 1831. Because it was a very infectious disease, it spread in the village. There were many sick people, so they kept them in one house called "HOSPITAL". The house doesn't exist anymore. The plague came from Europe. People in Ivanka were very religious so they prayed to saint Rosalie because she was a template of people with the black plague. In 1832 they built a chapel in her name. In the chapel we can see her picture and her hand, that is black because of the plague. We celebrate saint Rosalie every year on 4th September.
