

22 SEU "Georgi S. Rakovski"

22 SEU "Georgi S. Rakovski" is the successor of an educational tradition embedded in our cultural history as the Second Sofia Boys' High School, where the academic elite of Bulgaria has set a strategy for European quality of education and motivation of teachers and students for social prestige.

The building of our school is the best achievement of school architecture and construction from the thirties of the last century. The style is a typical representative and a good example of architectural modernism in Bulgaria between the two world wars. Today the building is a valuable architectural monument. It is included in the Beautiful Sofia Project.

The Act of laying the foundation stone of the new school building

This is the first page of our school's annals.

In the first decades of its establishment the school appeared in the cultural life of the capital such as the "famous high school", the "small university", the "Bulgarian Magnaura". This meaning and spirit the successor 22 SEU "Georgi S. Rakovski" fills with the events of a dignified path in the vicissitudes of time.

Our 22nd, as we all call it with love and gratitude, has always provided a solid comprehensive training of its graduates, predetermining the path of prominent and famous teachers and scientists, poets and journalists, lawyers and politicians, architects and engineers, actors and musicians - figures of Bulgarian science and culture, who have contributed to the prosperity of the nation with whose names the world has connected and connects the name of Bulgaria.

Today, at the beginning of the new 21st century, the teachers and students of the 22 SEU are taking on the challenges of the times as loyalty to their predecessors, to continue them to the best of their ability, to be part of future glory. Traditionalism is the memory of the legacy of the rich past that must be preserved; this is the tradition of inexhaustible spirituality, which requires complete devotion; this is the "trademark" that must be defended.
