

# Some days before Easter

The Easter bunny is busy painting eggs for Easter. But, how terrible, all paint cans are empty. He needs new filled cans with paint.

Only your OZOBOT-Easter-bunny can help the Easter bunny:

It shall bring new full colour cans to the Easter bunny. For that OZOBOT needs to pause at each can to pick it.

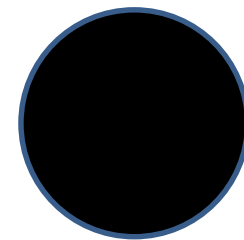

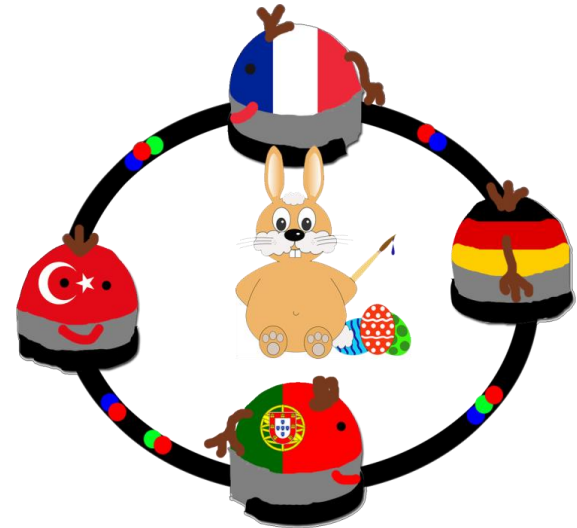

Be aware not to meet . It is very hungry and would like to have your OZOBOT for dinner.

Plan carefully before starting to use your felt tips to draw the colour code.

They are three levels (1 egg, 2 eggs, 3 eggs). Choose one and plan carefully before filling the colour codes!
