

Travel diary

By Andrea Cano de la Cámara

First day

We took the plane at 6 am and arrived at 9:50 am. We arrived and took the bus to a hotel where we met our hosts. We went to their houses and we got ready to go out.

That afternoon we went to the center and we had a guided tour to see the most important places in the city.

Second day

The second day we met the school that was very beautiful and modern.

Then we did an activity in the university in which we had to make sure that the university students filled out a questionnaire about globalization.

We also did another one in which we had to take photos of the most important and representative monuments.

Third day

The third day we went to a nearby town called Lodz where we saw impressive and very striking graffiti.

Graffitis

This has been the graffiti that I liked the most because it is very simple but represents every detail.

Then they invited us to eat. We also had a graffiti workshop related to our project.

Fourth day

On the fourth day we went to see a neon museum in which we designed a neon sign as if we were a communist state.

Fifth day

On the fifth day they gave us the Erasmus certificate and we said goodbye to school. Then we went to see the Christmas lights

Sixth day

On the sixth day we returned to Malaga. First, we took a flight to Norway and then another one to Malaga. The flight to Norway was impressive since we arrived just when it had just snowed and it was all beautiful.

Opinion

Many thanks for the opportunity, I have liked to meet people with another way of life and other customs. I have learned as much English as to relate to people different from me.
