

What does INDEPENDENCE mean to you?

Independence means doing whatever I want

For me independence mean if someone is independed on drugs or cigarets, mean you can't stay without dose of ninicotine or some addictive drug.

just not being restricted and pushed into doing things i dont want to,, choosing things for myself etc

For me independence means freedom. With independence we can become stronger person, because we can say our own opinion without affecting someone else opinion. it mean to make our own choices, to say no someone, to take responsibility for something.

Being able to express yourself any way you want to and think and act for yourself.

a person can take care of himself, and has own opinions

Independence is the feeling a human gets when they are doing what they enjoy, or trying to do something on their own terms. Independence also means not being commanded by someone or something e.g. political party, family, etc.

Being independent means to me be separate and not need anybody. Nothing hold us, we don't need anything and we can decide for ourselves.

It is like I am freestanding. I can do what and when I want. I am not reliant on my parents. I can go out whrnever I want and camo home whenever I want. But I have to be consenting. This is independence for me.

What does INDEPENDENCE mean to you?

Being strong enough to survive and live my life on my own. I cannot say that I am independent, because I am not. I depend on my parents my whole life. :)

Freedom, equality and democracy

for me independence means freedom for people to express themselves and for freedom to use it as to learn and improve it also means to me making my own choices and taking the responsibility consequences of those choices
