- STORY CONTENT**: This is where you add content to the stories that appear on your timeline. We have separated this into three sections:
 - BASIC INFO**: Here you enter basic info about your story, including its title, the date it occurred and some introductory text. You can also choose the story's category (add categories via the **Categories** tab) and also add a link to an external web page.
 - STORY MEDIA**: Connect images, audio and videos (YouTube, DailyMotion, Vimeo) to your story via the **Story media** tab. These will be turned into image and video galleries in the popup panel that appears when visitors click on the story in your timeline.
 - EXTRA INFO**: Access this via the **Extra info** tab. This is for stories that have a lot of text content. We allow this 'full text' content to be formatted with paragraphs and external links.
