

“My participation in the Erasmus program was one of the best experiences in my life. I met people from all around the world that I’m still friends with and I came closer to my classmates. It, also, helped me with my communication skills and I became more comfortable talking in a different language. I learned a lot more about other European countries and their culture, even my own, and gained more knowledge around subjects such as democracy and the environment. Overall, I had fun and it was a great experience. I would definitely take part in programs like that in the future because travelling, getting to know or meet other cultures and meeting and working with new people always has something to offer” **Katerina**

“Hey guys, I just wanted to tell you thank you about everything. This week was one of the best in my life and I’m really glad for meeting all of you. I hope to see each one of you in the future. Love you all”.

“My name is Despina and I am from Greece, and I were a member of the last year's ERASMUS + project. My host country was Estonia and my experience was the most beautiful of all. I learned a lot about other countries that were participating in the same project such as their culture, their customs and of course new people. People, students basically at my age who are very kind and made me feel that we are all like one person. I loved that experience and I hope I'll have that chance again!” **Despina**

“Last year I traveled to Portugal with the Erasmus+ project. My classmates and I visited Mafra, a town near Lisbon, the capital of Portugal. We also met people from three different countries, we explored places, played, talked and had a lot of fun together. Through the many activities we had, we got to know each other better. Moreover we collaborated very well even though we did not know each other. This experience was amazing because we made new friends and we are in touch even today. We are all grateful for this opportunity to travel abroad meet new places and people.” **Eftichia**
