MY FIRST JOURNEY

My first trip was to Lithuania with my family, when I was 3 years old. Of course I don't remember anything, but my parents idea for this journey was to hang out with their friends and some unknown company. As some unknown people were in the company and unfortunately my parents got robbed, so now we go to trips only with our friends. I hope it will be a lesson for all.

YOUTH HOSTEL

One of my last trip was with my bestfriend and we went to Estonia. Our idea for this trip was to get away from it all and to have new experience. The first challenge was to recognize our youth hostel and because we didn't know that we had booked a room in a hostel, not in a hotel. We had a room with six more people, that definitely was interesting. But with all that we had a lovely view from our room. And we had an opportunity to broaden our horizons and get out of our comfort zones. I like Estonia, because I think it's authentic , especially the old town.

CAMPERVAN EXPERIENCE

This trip was beautiful. This trip was with my family and we rent a campervan. This was our first time travelling with caravan and it was amazing. We could go and stop over everywhere we wanted and we saw some mind - blowing views. The first that I would suggest is to take only important things, because there isn't a lot of space. Second tip is make a research before getting a campervan, because our caravan was run - down,the toilet didn't work there, so we needed to stop over a lot. But at the end it was worth it for the breathtaking landscapes.
