

# Venice

---

*Venice is a place where you should go at least once in your life. It's a place where you can totally get away from it all. Are you bored with your endless routine? Are you taking bus every day to school or work? Take your luggage and pamper yourself in St. Mark's Square. If you're feeling vibrant, rent a gondola and sail through the Grand Canal. You can have a lovely view during the sunset in Venice. As we all know, Venice is overcrowded, especially in summer, so if you're looking for a lower cost and have a chance to admire the purity and beauty of a floating city, you should go there in winter. If you're having a city break in Venice, you might visit "Palazzo Contarini", "Palazzo Contanini" and, of course, "Saint Mark's Basilica". Basilica's main facade has an ornamented Gothic roof line and most of the upper areas have gold ground mosaics. If you're planning to walk, some places might be inaccessible, because of the water, so a good idea would be buying a city boat card. Venice's city boats have the same purpose as city buses in other countries, only a lot more fun and exciting. Imagine- shipping from your hotel to "Peggy Guggenheim Collection" museum, from museum to restaurant. Venice is also famous for their carnivals. Carnival time in Venice is a place where everyone dresses up like plague doctors, Bauta, Colombina or Pantalone. Venice suddenly turns into and even more joyful, hued and a little scary place. You will have a good time in Venice while having new experiences and seeing new sights. Also Italians are very hospitable. You're not gonna have any problems figuring out where to eat out. Try out Italian-made pizza or try some sea food at the fanciest restaurant. Did you make up your mind about your next location? Venice is the best place.*
