

21 century skills

These days young people are expected to possess new skills in order to adapt themselves to new scenarios.

These skills are:

- Critical thinking: it's essential to improvement. It's the mechanism that weeds out problems and replaces them with solutions
- Creativity: this skill empowers students to see concepts in a different light, which leads to innovation.
- Collaboration: it means getting students to work together, achieve compromises, and get the best possible results from solving a problem.
- Communication: talking to others Without understanding proper communication, students in the 21st Century will lack a pivotal skill to progress their careers.
- Technology literacy: with it students can adapt to the world more effectively. They can play an important role in its evolution.
- Flexibility: requires them to show humility and accept that they'll always have a lot to learn — even when they're experienced.
- Initiative: this is one of the hardest skills to learn and practice. initiative is an attribute that earns rewards.

Young people should also have a good knowledge of English and mathematics.

English is now the most used language in the world of international and professional communication. It is impossible to ignore this reality and even those who do not need it today will not be able to do without it in the future, whatever their need is. English for the world of work is a highly strategic move, as it can launch your career. On the job market, a good knowledge of English is now a very important criterion.

Mathematics is everywhere.

We are surrounded by it in our everyday life:

- When you shop, when you buy a house or apartment Installments with interest rate. To know exactly what you will pay, what you will have to save, what you will have to repay, the calculation of the interest rate is essential.

In conclusion, in my opinion in the 21st century we should all have a good knowledge of both English and mathematics to adapt to the world we find ourselves in and the future that awaits us.
