E-Safety

Internet safety or E-Safety for short is maximizing the awareness of Internet users of the security risks with private information, as well as trying to protect your personal safety and improving information security. Over 45% of the users have endured some sort of cyber-harassment.

THREATS

Internet can be dangerous for everyone, especially children and teens. Here are some of the risks of being online:

- Cyberbullying
- Cyber predators
- Posting private information
- Phishing
- Scammers
- Malware software

SAFETY

To be safe when online, there are a couple of helpful advises. Those are some basic tips to ensure your privacy is yours only:

- Use strong passwords
- Keep personal information
- Update your security software
- Set up two-factor authentication
