

Made in Turkey. The brand called Zara. It comes from Spain. The first Zara store was opened in 1975. Some of the brand's clothing is produced in Spain, 26% in other parts of Europe and 24% in Asia, Africa and other countries. The company produces 800 million items of clothing annually, i.e., an average of 11,000 models. Workers get PLN 1000 per month. The clothing is probably to be transported by ships. I paid PLN 35 for this one. I am really surprised with most of the facts because I had no idea about them before. I usually buy new T-shirts when I need them or when I like one of them. When I stop wearing it, I think I will give it to someone from my family or sell it. I believe that customers have a great influence on a given brand because without them it would not exist. I think customers should buy the clothes they really need so as not to waste them.
