

INITIAL EVALUATION: ASPECTS RELATED TO THE THIRD RING

Do you use a different transport in summer / winter?

What type of transport do you use to get to school?

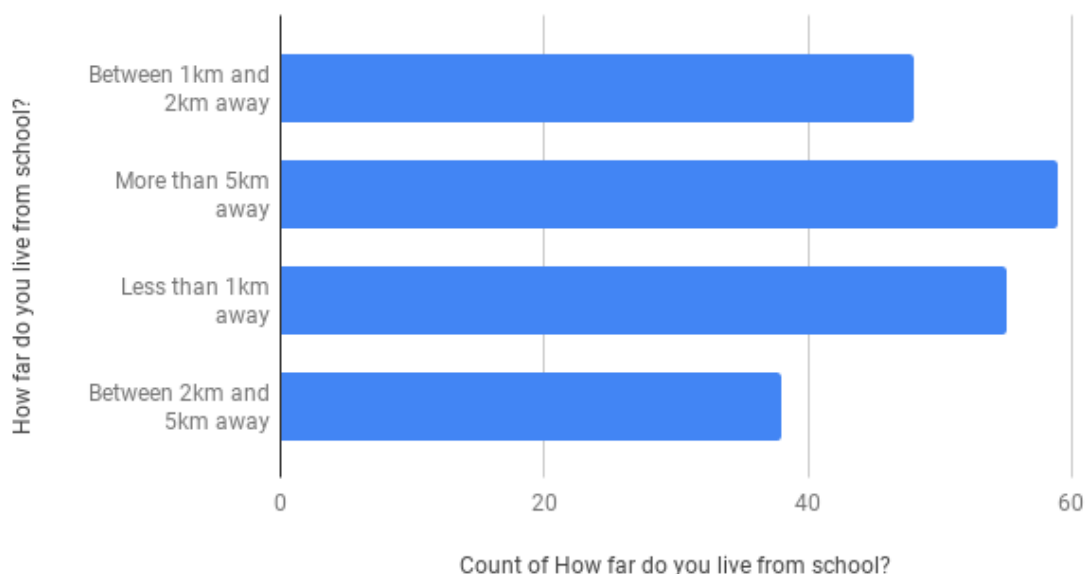

HIGHWAY TO HEALTH (#h2h2020)

How far do you live from school?

Can you think of an alternative way to reach school? What difficulty you have to use it?

These are the most common answers:

On foot ;-) Too slow

I could and should go to school walking and return walking too

On foot. It's difficult because i live far from the school

I could go on foot but sometimes it's dark and my parents do not want to me to go

Sometimes I go by bike

Bike: no bike roads, hilly landscape

Bicycle but too far away

Bicycle but I don't have one :(

By bike but the road is too dangerous

Yes, sometimes I ride with a bike to school. But just in summer.

Public transport (not really practical)

I'd happily use the bus if there was a line to school

By bus, if there was one

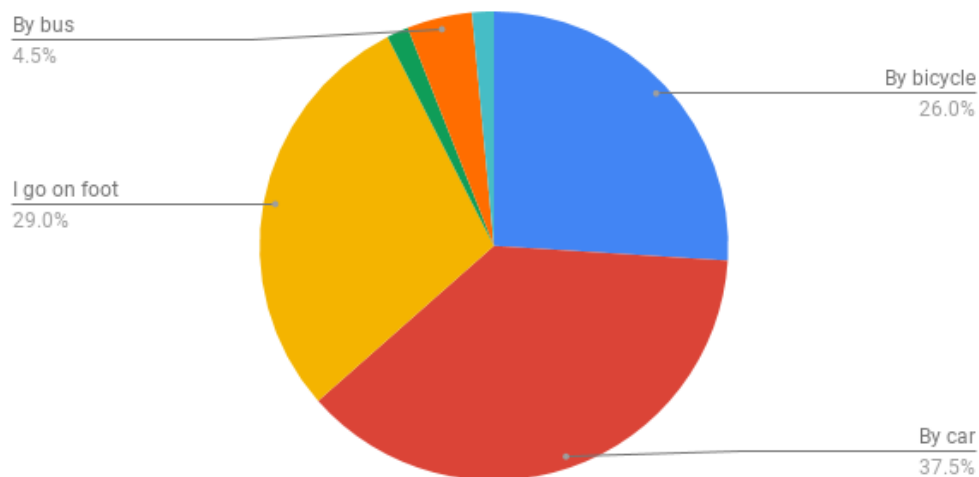

By bus if I had an assistant to accompany me

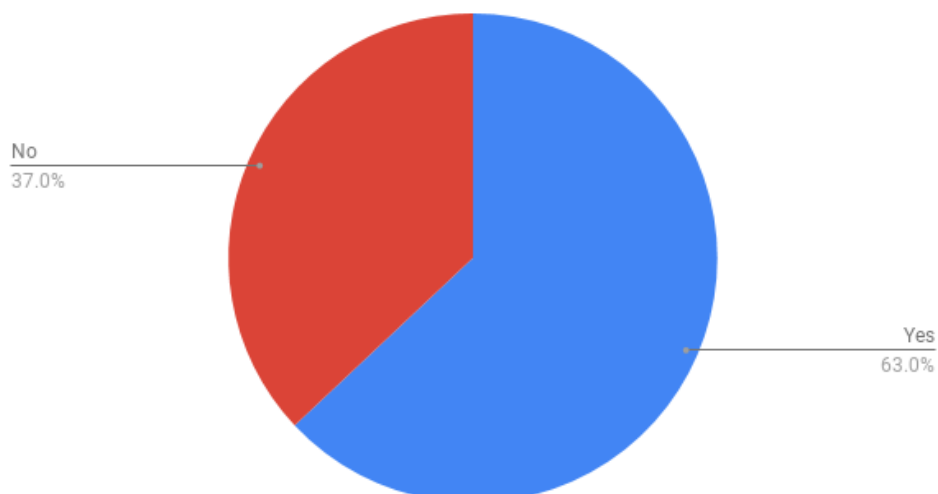

HIGHWAY TO HEALTH (#h2h2020)

What type of transport do you use for other activities? (Youth movement, sports club..)

Do you use a bicycle to get around?

HIGHWAY TO HEALTH (#h2h2020)

If you answered no to the previous question, why not?

These are the most common answers:

There are not very good facilities to use bicycles to get around
No bike roads

I don't have my own bike
Because my bicycle is too small for me.

I don't really have a bike, I just prefer to go like for a walk.
I prefer go on foot and my house is within walking distance of the city centre

Every place I have to go to is just too far away. Our village hasn't got a supermarket or anything like that.
It's far away by bicycle.

Because it's very cold outside

My bike is broken
Because I have a deflated bike

I am not sportive
Because I am too lazy

Because I don't have a lot of time, and by car we go faster

Because sometimes I've got to carry my musical instrument or some folders.

HIGHWAY TO HEALTH (#h2h2020)

Which could be your favourite means of transport? (Use your imagination)

These are the most representative answers:

Teletransportation

Flying cars

A covered bicycle

A bicycle with an engine

Any sustainable means of transport

A private jet

A flying skate

A flying bicycle

A flying bus.

Something that could fly

My favourite means of transport it would be a type of plastic bird that flies and in the back of the bird two places or three to sit down. One for the driver and the others for the passengers.

A horse

A limo

Shoes that take you where you have to go, but five times faster.

A spaceship
