RE & CF

HATAY BİLSEM

Renewable Energy (RE) and Carbon Footprint (CF) are very good friends. One day they were candidates for the presidential election. All candidates worked hard and prepared a presentation. Since the presentation day came, everyone presented their presentations in turn. When it came to the CF, he made his own presentation. He was so convincing that everyone said they would vote for him. But there was one last person. And RE is the best friend of that carbon footprint. RE opened people's eyes. Everyone stared at him in amazement. Everyone applauded as RE descended from the stage. When it came time to vote, RE won by a large margin.

RE & CF

HATAY BİLSEM

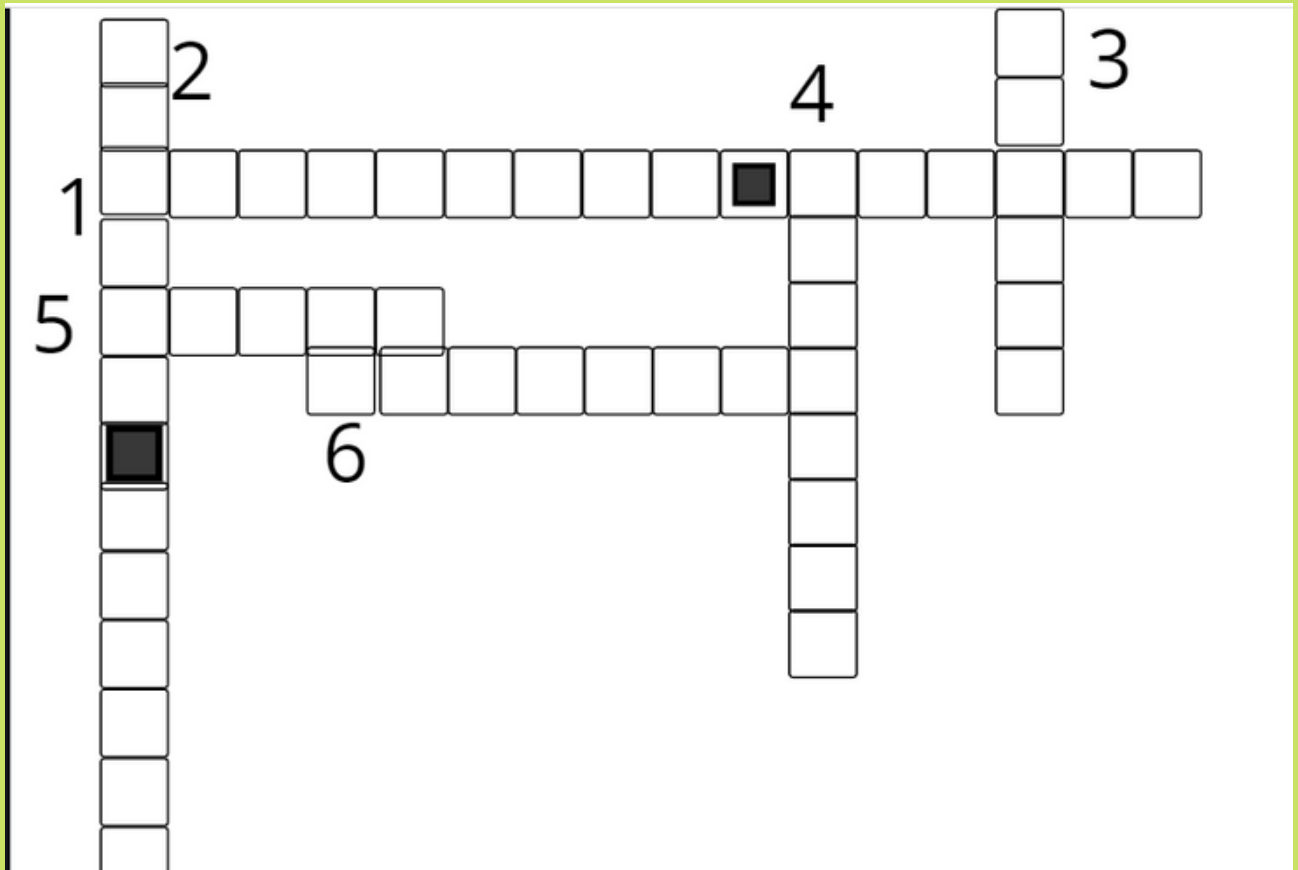

E-dictionary

renewable energy- energy sources, the use of which is not associated with a long-term deficit, because their resource is renewed in a relatively short time

Carbon Footprint - Total sum of greenhouse gas emissions caused directly or indirectly by an individual, organization, event or product

Fossil fuels - substances formed from organic compounds as a result of being stored underground for several dozen or several hundred million years

Solve the puzzle reading the clues

Trails

Horizontal:

1. This energy never ending.
5. Put a paper in a vase for choose an anyone.
6. See something light.

Vertical:

2. Friend of renewable energy.
3. How did the candidates work?
4. It is a group of peoples

RE & CF

True

False

2. RE and CF are writing short story

True

False

3. Some candidates work hard and the other watched

True

False

4. Re loses the vote

True

False

TEARS OF WATER

BOLU BILSEM

For some unknown reason , all water resources in the world have disappeared. This development, which could bring the end of human history, seriously threatens all humanity. We need to talk about something:

Tears of water

“When Earth was born, there was lands and water. But bad something happened . Monsters are everywhere, distributing everything, eating lands, drinking water, destroying entire world. Water drops becoming tier of nature .We called them “humans”. Ther’re clever not as using renewable energies, they’re strong but not as protect their home,they’re senseable but not as respect their habitat. We’ve to use our last chance the groundwater sources. Maybe they can use renewable energies, maybe they can protect their home, maybe they can respect their habitat for their last chance. We don’t need heroes because , we’re the heroes of our planet. If we watch out of our moves, we win. If we care about future , we win. If we warn people, if we make them realized , we win. If we win, happiness wins, peace wins. We don’t need heroes, we need ourselves.”

Mom: Did you see the news?

Dad: Unfortunately, so that’s why the water in the house has been cut since yesterday.

Mom: How long can we go on like this?

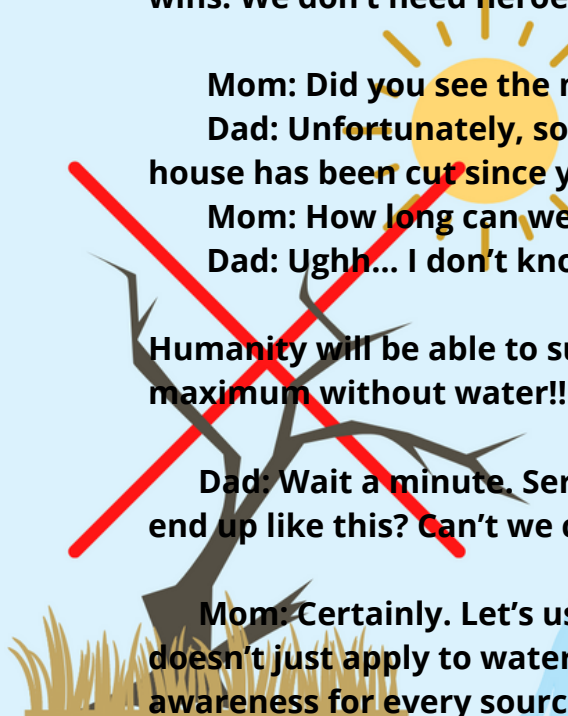

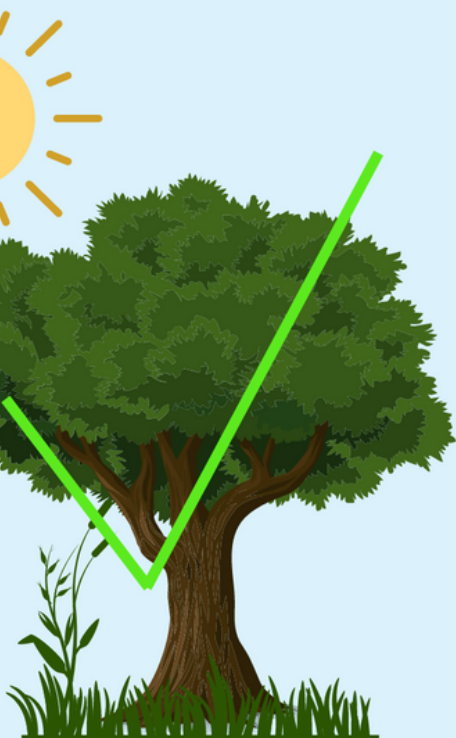

Dad: Ughh... I don’t know.

Humanity will be able to survive for a few years maximum without water!!!

Dad: Wait a minute. Seriously, does this really have to end up like this? Can’t we change this?

Mom: Certainly. Let’s use water correctly. But this doesn’t just apply to water. We must show the same awareness for every source. I think we can do it.

What do you think?...

GAYA AND THE NUCLEAR

CEIP CAMPOAZAHAR eTwinning

GAYA AND THE NUCLEAR

A long time ago, in the world of contamination the non-renewable energies together formed the nuclear explosion. Luckily, we had Gaya, a monster made of renewable energy. Gaya fought the nuclear. The nuclear used his power to destroy the world, using the non-renewable energies. However, Gaya destroyed some parts of the nuclear. She used eolic energy with hurricane wind, she also used the solar energy with powerful solar lightnings and finally, she used the geothermal energy with magma tongues. Gaya tries to eliminate the parts that are left of the nuclear, but she didn't defeat him. She still needs our help. Let's help the environment! Let's help Gaya! Let's help the World!

GAYA AND THE NUCLEAR

CEIP CAMPOAZAHAR

RECYCLING IN THE FOREST

KAYAPINAR BILSEM

The fox walks in the forest. It tripped and fell to the ground during walking. It stood up. It looked about what think on the ground. It doesn't know what it is. It is transparent and oval. It decided to take this thing to Wise Owl. On her way to the wise owl's house, it met reindeer.

Fox: Hi, reindeer. Look what got my foot stuck on the way here. I am going to Wise Owl's house to learn what is this.

Reindeer:Hi fox. what an interesting thing.Do you want come with me?

They set off. They hear a scream when they are near the river. The scream is from carp.

- Help me!

They save carp. The thing entangling the carp is also transparent, but unlike the thing entangling the fox's feet.

- Thank you friends.

- We go to Warm Owl for understand what they are. Come with us.

They arrived at Wise Owl's house.

Wise Owl: It is a bottle and it is a pochette. people should throw them in recycling bins. Otherwise, these wastes will poison the soil and harm living things.

They cleaned the jungle and the forest became clean again.

ZOFIA KOTAS RE & CF YEARS LATER

ZESPÓŁ SZKÓŁ TECHNICZNYCH I HANDLOWYCH IM

Renewable energy (RE) and carbon footprint (CF) are very close friends. They have known each other since being in kindergarten. It's been a long time. Now they're old people. RE is so healthy, he eats a lot of vegetables, drinks a lot of water from his well and he doesn't buy any bottled drinks. He hates plastic packaging. He cares a lot about the planet. He decides to start using an electric car. When he was younger he worked as an ecologist. CF, on the other hand, is not on a good diet. He feels sick and he has breathing problems. When he was 35 he was a smoker, he smoked a pack of cigarettes a day. He worked in a mine. He was burning coal in his fireplace. He's driving an internal combustion car and he's eating a lot of fast food. One day RE and CF decide to meet after 10 years. When RE saw CF, he clutched his head in disbelief and he said to him:

-As I see, you still haven't decided about starting a healthy life. Do you want me to help you?

-Don't say anything... I've tried hard so many times. If you would like to help me I'd be grateful!

-Fine, take this. It's a list of things that you should change. After 2 months CF called the RE and said that he started to follow the advice that his friend gave him and in this way saved his life. As he explained, he even visited a doctor and he warned that he could die from lung cancer if he doesn't change anything shortly. CF took it seriously. Now he is an example to follow. All's well that ends well.

So remember that helping our planet and living a healthy lifestyle, can save you and others.

WHAT ARE WE DOING!

SINCAN BILSEM

Emirhan and his friends were happy in the morning. They greeted their teacher and entered in the classroom. The first lesson was Social Sciences and they began to talk about Climate Change, Global Warming. In the end, the students were assigned to prepare a poster about these 2 threats. Emirhan went home and searched through the internet, read loads of articles about Climate Change, Global Warming and he got hopeless about the sustainability of our world. He prepared his poster and told about the precautions all the people should take for the sustainability of our world. He applied himself to his crucial task in such a way that his teacher gave him the badge of 'World Defender'. Emirhan was sure that heroes do not need to wear cape, if we are working hard for our world we are all heroes naturally. The world is all ours.

WHAT ARE WE DOING?

SINCAN BILSEM

eTwinning

E DICTIONARY

? WHAT ARE WE DOING E-DICTIONARY

Social Sciences- the scientific study of human society and social relationships.

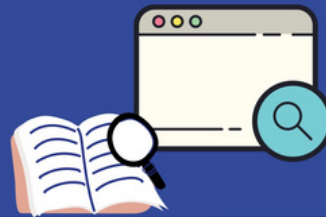

Climate Change- a change in global or regional climate patterns and attributed largely to the increased levels of atmospheric carbon dioxide.

? WHAT ARE WE DOING E-DICTIONARY

search- try to find something by looking or otherwise seeking carefully and thoroughly.

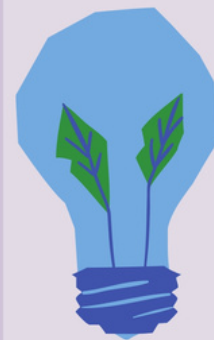

precautions- a measure taken in advance to prevent something dangerous from happening.

crucial task- extremely important task.

Hopeless - no sense of hope.

Sustainability - chances of survival.

Global Warming- a gradual increase in the overall temperature of the earth's atmosphere generally attributed to the greenhouse effect caused by increased levels of carbon dioxide, CFCs, and other pollutants.

(ecological) threats - the state of the environment that may adversely affect people and animals.

Defender- a person who defends someone or something.

Badge- distinct mark or identifying signal. An emblem given as an award or honor.

articles- a piece of writing included with others in a newspaper, magazine, or other publication.

ELEPHANT AND RAIN SPIRIT

DWUJĘZYCZNA PRYWATNA SZKOŁA

ELEPHANT AND RAIN SPIRIT

Elephant and rain spirit were in constant dispute together. The elephant, proud and boastful, claimed to be the more powerful. The Rain Spirit cried out, "How can you claim to be more powerful than me, if it is I who feeds you!" But the elephant replied, "You don't feed me. I find my food itself." As a result, the rain became angry, became dark gray and thundered, "If I leave, you will die," and disappeared. And for a long period of time there was no rain. The elephant begged and threatened, cried out for help, but the rain did not want to come. After a few months, a total drought came. Finally, the elephant realized his mistake and asked the rain spirit for rain. When the rain saw that all the animals had learned the lesson, He felt sorry for the thirsty earth. He shook himself and a Cloudburst fell and the rivers and depressions filled up again.

E DICTIONARY

ENERGY LEGENDS

One day, an enormous Snow Giant decided to flee his home at the North Pole in search of love. He travelled and travelled for several weeks until he reached the kingdom of the Sun, a powerful deity from the Equator.

There, the Giant began to lose its power and, slowly, it started to melt down. Not knowing what was happening to him, he started crying and screaming. The Sun heard his yells and decided to descend from the sky to talk to him:

- Who's disturbing my silence? asked the Sun.
- Please, oh mighty Sun, help me! I'm melting away! cried the Giant
- My energy and my power know no limits! I cannot help but feel sorry for you.

Once the Giant disappeared completely, a fragile and beautiful snowdrop grew from the ground. The solar energy helped the little flower grow and become strong.

GOOD CHOICE

SZKOŁA PODSTAWOWA IM

There are 2 factories in Zielonka. The first "Siwy Dym", which has been operating on the market for many years, deals in the trade of hard coal and lignite. The second is a young company, "Transparent", which produces photovoltaic panels.

The public's reputation and awareness of ecology made "Transparent" a leader on the energy market.

"Siwy Dym" fell into considerable debts due to stagnation in trade and insolvency of creditors.

Due to the necessity, the director of a coal trading company was forced to seek help from competitors. However, the management and management of "Transparent", although with a difficult choice, were forced to refuse to help. As the director says, "We do not want to take part in poisoning our planet and the ecosystem!"
