

The War in the East of Ukraine

Problems that worry the students of Monastyrshche, Ukraine

The war in the East of Ukraine crashed millions of the Ukrainians' lives. During the two years of war a lot of towns, cities and villages were destroyed. Terrorists are very cruel. More than 8000 people were killed, 6000 of them were the civilians. Survival in the combat zone is very difficult, so many people were forced to leave their homes and to become refugees. Many of them lose their relatives, friends, neighbors and everything they love. Some people had to bury their killed relatives in their yards. Children find shells and play with them – that is dangerous for their lives.

It is very awful to see that our Motherland is being ruined and innocent people are suffering. I hope that this meaningless war will stop one day forever and people will not kill each other.
