

Chimney Sweep

for **Job Hunters** project

A chimney sweep is a very unusual job. It is very old.

A chimney sweep is a worker who clears ash and soot from Chimneys

A chimney sweep is a rare job nowadays. There are only fifteen chimney sweeps left in Ukraine. They work in the town of Lviv.

Chimney sweeps must be brave because they work in dark chimneys. They also must be thin to get into a chimney.

Chimney sweeps help people and people respect them for they do.
People even make monuments to them.

These are the sculptures of chimney sweeps in Lviv and Mukachevo, Ukraine

It is a dangerous job because you have to work high on the roofs. Their work is also not very pleasant because it's dirty.
