Points of weakness of this project

34 responses

Sometimes the communication was unclear with the italians.

It is a pity that we were unable to skype due to the circumstancess

It wasn't always clear

the communication between students is very difficult

it was hard to organize the work due to the homework of the other subject

lazy people

Communication

distance and communication

The Italians didn't fully understand the experiment we wanted to do.

Points of strenght of this project

39 responses

It was well orginized.

It was nice to communicate with the Italians

The communication with the Italians

working together with people from other countries.

You learn a lot of new interesting things about physics. You have the opportunity to work with new people that don't live in our country and a new friendship can begin.

the exchange of culture and ideas between students of different countries

working with students who live in another country and speak a different language has been very stimulant

contact with people with a different culture

What could YOU have done better?

35 responses

communicate more with the italian guys.

I think we handled everything pretty well as a team. Both the communication preparation and the experiment.

to communicate more with the italians

I could have thought a funnier photo of both groups.

communicate with belgian partners

we could have communicate better with the belgian guys

be more strict with the others, i did almost everthing myself

We could have done better the analysis from the beginning

video. photo and powerpoint

What do you think YOU did very well?

34 responses

Making the analyse form our project

Communicate with everyone and the teamwork.

helping with the practicum

everything someone had ordered to me, I did it

we did our best to stay focused and revise our job to make it better

communicate

The part when we had to film the experiment

I was making sure the work was ready on time

The cooperation went fluently.
