

The Italian team made a presentation on

## Wind energy and a model of Wind Generator of Energy

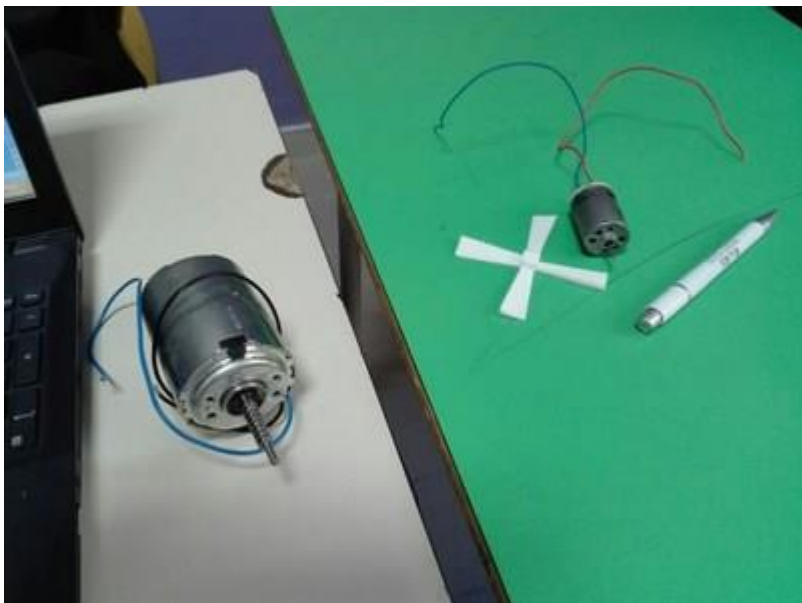

During the month of February another experiment was taken in class with the students of 3 B Mat. The teacher of Electronics, Mr Francesco Paolo Tirrito, let the students build a model of Wind Generator of Energy.

With simple instruments they could understand how a wind energy plant works. The next step will be a visit at one of the plants existing in our territory

Here are some pictures with the students of the 3rd B MAT

# Be sustainable! Secure your future!

In our daily life we heard the word “energy” in several context: “renewable energies”, “kinetic energy”, “energy saving”, ... Has energy always the same meaning? Are we able to produce our own energy? Why is so important the energy? Answering this questions, the pupils should become aware of the importance of the energy in our World and about the nee...
