SAVE

ENERGY

-

ÀNGELA PLA SENA AND XELO GÓMEZ MÍNGUEZ 4ºA

INDEX:

1-THE MEASURES THAT WE TAKE

2-THE RESULTS

1-THE MEASURES:

The measures that we put in practice are:

1.We make posters to convince the students to turn off the computer, because it improves energy save at our high school.

WHEN YOU DON'T USE THE COMPUTERS, TURN OFF THEM PLEASE

2.We pass into all the classrooms for saying the people that they must turn off the computers to help to save energy.

3.In these talks, we say the students that they must choose a superviser for inspecting if the issue that we talk about is carried out.

2-THE RESULTS:

After applying the previous measures, during one week we entered into all the computer classrooms for checking the results and it convinced us that our project is going on in the good way.

DAYS FOR WEEK	COMPUTERS THAT LIT IN ALL THE COMPUTER CLASSROOMS
MONDAY	5
TUESDAY	8
WEDNESDAY	9
THURSDAY	7
FRIDAY	10

As we can see in this table, the students ignore us but we recognized that they used to leave more computers lit before our talk.

Related with the measures that we put in practice, we can say that they respect our posters.

And about the superviser, some classes get results, but the others no.

In fact, we are proud of our project, because thanks to it, we improve a little the energy save at our high school.
