

Besides the subjects like maths, history, italian, english, geography and science we also study specific subjects like navigation, logistics, mechanics ,electrotechnology ,design and art.

We have also practical lessons in the laboratories like the nautical simulator, the mechanics laboratory and the fashion one.

Civitavecchia is a seaside town, far 70 kilometres from Rome, the capital city. its destiny is linked to the port, which is one of the most important in Italy and Europe. Today, the city is a real tourist hub, thanks to the port of Riva di Traiano and the flourishing cruise market.

During the first mobility in Italy, as you know, we spent some days together sharing several nice activities and visiting places like Rome and Tarquinia. We remember with a great pleasure those days and we hope to meet you again.
