

I would like to write about my trip in Seville, Spain and about all the activities that we did there, not to mention the amazing people that I got to know there.

First of all, we arrived to Spain and we went to the hotel by the help of a Spanish teacher Jesus, when we settled in we immediately went to eat because we did not have something to eat for hours. Next day it was a free day and we went for a walk in the center of Sevilla to see the beautiful town. The time past and we went to see the Plaza of Espana. I think that was the most beautiful sight I saw in Spain because it had all these people from all over the world and you could see the smiles for being there but that one thing that caught my attention was the flamenco dancers I was so impressed from their posture and the moves that they did. On Monday we went to meet the other students of the program to the Spanish school. Then every country introduced their presentation and we had a little talk about them.

When the presentations ended we went to eat all together and got to know each other. To be honest at first it was a little bit awkward but as time past we were all more comfortable. The next day we went to the recycling factory in which they

presented us the equipment they use for recycling, then they had prepared a presentation about the importance of recycling devices such as refrigerators . Not to mention that we went to a village called Galaroza, there we slept 2 days all together as a big family. Every country cooked a traditional food, also we went two times for hiking and I found it interesting because it reminded me of my village and brought again some awesome memories.

In my opinion I think I have improved my skills of communication and the collaboration with the other people.

This trip will be never forgotten and the people I met there. I look forward to meet them again and have fun all together.
