Is there something to be improved ?

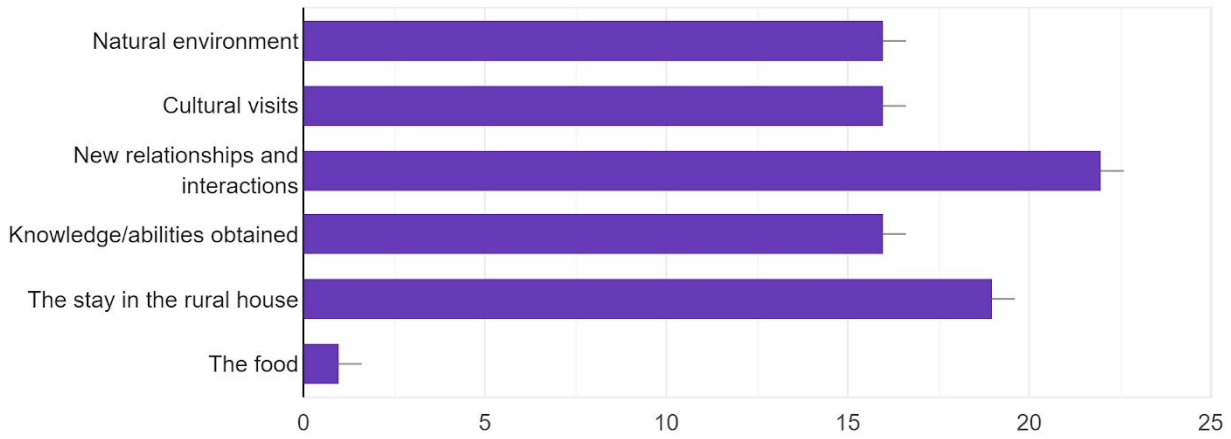

23 respuestas

- No
- There is too little free time.
- En un futuro seguir mejorando el dispositivo y el software.
- Nothing that I can think of right now.
- Creo que todo ha sido tan genial que no se me ocurre nada que mejorar.
- The field trips should involve actual participation of the students. For example, the air may be measured at different places and times so that the data is enriched and then, analyzed. Another suggestion would be that the walks in the mountains have a better and more important application and connection to the project itself.
- More time together and more activities about the pollution.
- More time with Greek and Bulgarian companions.
- Trayectos más fáciles.
- I think all is ok, it was a good programa.
- No, perhaps a little less walking..
- Everything was amazing, nothing to improve!
- More time together.
- Nada que mejorar en mi opinión.
- Anything special.
- No.
- Some exposition could be better prepared.
- Seguir desarrollando ideas buenas y útiles para concienciar a la gente de los problemas medioambientales
- Nothing.
- No.
- All in live can be improve, we just need to keep going on in this project. Our coexistence was amazing. Not always all have to be perfect to make the best experience.

What aspect of the mobility did you like the most_(choose one or more)

23 respuestas

Global evaluation of the mobility
