

Hi guys, my name is **Elga** and I'm an Italian girl.

I attend a high school specialized in languages in Imola, in the province of Bologna.

I chose this school because I love languages and I think that they are essential for travelling abroad and discovering more traditions and cultures.

I find travelling very enjoyable, but up to now I have only been to Vienna and London.

Last summer I visited London, it was more than beautiful.

I stayed there with my family and other two families and the things that I liked the most were:

the London Eye, the Tower bridge (above all at night) and of course the Big Ben.

I'm a very sociable person. I get pleasure from lots of different things, for instance, my friends and my family. I'm grateful for all of what I have.

I try to see the positive side in everything that I do.

I'm polite and friendly, all in all, I have a great image of myself.

These are all qualities, but I have some weakness: I'm too shy, I am often late, and I bite my nails when I'm nervous. I'm also **lazy**, above all in the morning when I have to get up to go to school.

My favourite subjects are languages: English, Spanish, German and Italian.

I'm mad about volleyball, and when I grow up I'd like to become a professional player.

I have been playing volleyball since I was 7 years old. It is my biggest passion and this year I have 4 trainings a week but not in Riolo Terme (where I live). This year I have decided to play in Ozzano to improve my volleyball skills. My favourite volleyball players are **Matteo Piano** and **Matt Anderson**: they are *my idols*.

In my free time, I also enjoy listening to music, dancing, and acting. Maybe next year I will sign up for some theatre classes. I love making new friends, and going to the seaside, to the cinema or going out to eat.

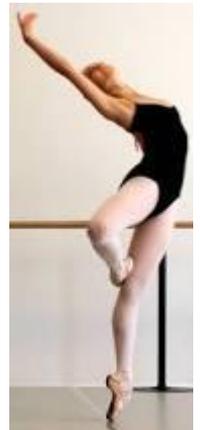

When I grow up I would also like to become a designer like my dad. I have no idea what the future holds for me but this year I have improved my language skills. However, I'd like to find a job that allows me to travel abroad using the languages that I'm studying now.

Hi, my name is Aleksandra and I'm fifteen years old. I was born in Imola but I'm currently living in Toscanella, a small town near Bologna. I'm an only child. Lots of people say that me and my mum look alike, we both have dark hair and green eyes and we're also not short. People also say that I take after my dad, but not physically, temperamentally. I can be very excited but also a bit anxious. **This year I'm attending the second year at the high school 'Alessandro da Imola', I am in the language course. My favorite subjects are modern languages; I study English, Spanish and German. I'm quite good at English and Spanish but I've studied German only for a year so I'm not that good even though I like it. I don't like Latin and Maths that much, to me they're boring and I find them really difficult. I don't practice any sport currently but I used to play volleyball. During school, I don't have a lot of free time but when I can I like to watch movies, go out with my friends, listen to music or read which I did a lot last summer: I mostly went out. There's a picture on the site of me with my class, our class is 2GL, try to guess which one it's me!**

It is hard to speak about myself, but let's try. My name is Luana Vangjeli, but friends call me Lulu and I like it. I'm 14 years old, almost 15 considering that my birthday is in november. I was born in Imola, in Italy and I'm still living here with my family which is made up of my parents, my younger brother and I; my parents are from Albania. I am a student at a high school specialized in modern languages and I'm attending the second year. The languages I chose are: English, German and then last but not least Spanish, but I must admit that my favourite one has always been English. I love languages, learning them and discover more and more about the country and its culture. To be honest I have no idea what could be my future job but I'm pretty sure that I'd like to travel a lot and interact with people. Of course, I don't think about school all the time, in fact I like to keep fit and four times a week I attend ballet classes. I've been dancing for almost four years, it's exhausting but it's worth it. During my little spare time I enjoy hanging out with my three best friends or just chill in my bed watching movies; listening to pop music or best among all sleeping, I'm such a sleepyhead.

Hi! My name is **Alice** and I'm fifteen years old. I was born in spring but my favourite season is summer. I have a singular surname (Feichter). No, I'm not from Germany. My father comes from the North of Italy. I'm a green-eyed girl. I'm friendly so I have a lot of friends and I like to stay with them. I'm not very tall, for this sometimes my friends tell me 'Wow! You are really short' and everybody starts laughing... everybody except me.

I live in Imola, a town near Bologna, Emilia-Romagna. I attend the second year at a High School specialized in foreign languages and I study three languages: English, Spanish and German. I enjoy studying new languages. Sometimes it is difficult but my purpose is to learn all these languages perfectly. My dream has always been to live in New York. I like big cities and I've always loved the U.S.A.

My family is made up of my parents, my sister, my two brothers and I. Usually I talk to my sister about everything, often we go out together and if I need some advice she helps me, but if I want to have fun there is my brother, we play like two little kids.

I have a half-brother, we get on well. If I have problems with my computer or with my mobile phone he is an expert and helps me. My father is a cook, he has his own restaurant in which he cooks typical dishes of Northern Italy, I think this is why I like cooking. When I was a little girl I always wanted to help him in the restaurant, probably he passes me this passion. Often when my sister and I are bored, we cook something, for example cakes or muffins.

I have dance classes. It's my passion. I could dance for ten hours and I wouldn't be tired. I love dancing hip hop and therefore I always listen to hip hop and commercial music and my mother is getting tired of this kind of music, she can't stand it anymore. My crew of hip hop is like a second family for me. When I feel sad I prefer to listen to piano melodies. I'd like to play the piano but with the school, dance lessons and other commitments I can't, I don't have enough time.

In my free time, I always listen to music or I cook. ..I don't like going to parties or to the disco. I prefer to stay at home with my close friends watching a movie... a horror movie. I love this genre of movies; I love being scared. A movie that scared me was 'The Conjuring'
