

My name is Ondra Ferra. I would like to introduce you to my life, my hobbies, my family and generally to myself. I am sixteen years old, I was born 20. November 1998. I grew up in Prague, but when I was six years old my family moved to Dobříš, a lovely town in the countryside, where I have lived ever since.

First of all, let me introduce you to my hobbies. From a young age, I have always been very sensitive to language. My parents noticed this and made sure to put it to good use. I first met English when I was five. Since then, I have gone through many teachers, native speakers, books and also films. At age fifteen, I have completed the Cambridge FCE Examination, figuratively finishing my English studies. From then on, I have chosen French as my next language. I have been studying it for four years now, making significant progress. Last year I got an opportunity to take courses in Russian, and so I added another language. As for the future, I am thinking about looking into either German or Spanish, I have not really decided yet. As far as sports go, I have been playing tennis for ten years now, participating in competitions during the summer. I also enjoy working out at the gym, skiing or cycling in the woods around our town. My music taste has been influenced heavily by the fact that I play an electric guitar. If I really had to choose a favourite artist it would have to be Metallica, although I enjoy any kind of music really. There is one more hobby I would like to talk about, It is Motorbikes. I love motorbikes and anything that is connected to them. My father has brought me to this hobby as he is also a motorbike enthusiast, has been since a young age. I enjoy going for a ride in the summer, as well as an occasional festival parade. (See photo)

Me on my bike during the Harley Davidson parade in Prague, 2015.

and Příbram (a town nearby) His father, Alex, used to be the director of Mladá fronta, one of the most influential press companies in the republic. During the time of communism, he was against the oppressive government and quickly became an unwanted person. As a result of this, he lost his high position and worked as a barman until the revolution. I have six cousins, all of which are boys. I have a younger sister, her name is Tereza and she studies at my school as well.

I would like to mention my friends as well, they are all wonderful people and I love spending time with them. We do hiking trips in the woods around our town, go biking together and also know how to setup a proper party in the summer. Sometimes we have some disagreements, but in the end, we always get along well.

I disclose my paper with lots of expectations, I look forward to working together with some of you, making some new friends and spending some quality time together. Thank you for reading and I hope to hear from you soon.

Me

My family is quite large, so I will not try to describe it all. My parents have been divorced since I was twelve, so the relations in my family are not always friendly. My mother, Zuzana is a doctor who specialises on ears, noses and throats. My father, his name is Jiří, is a plastic surgeon, he works in Prague

Me with my friends during our trip to France. Photo taken in Versailles. (I'm the second from the left in the back)
