

LSI Teacher Training: Observations

1. How often do you get observed in your job?
2. Who observes you? Is it normally the same person?
3. When you are observed, what happens before the observation? Do you meet with the observer? And if so, for how long, and what happens?
4. What does the observer write during the lesson?
5. How do you do feedback? Do you do it straight after the lesson? The next day?
6. Does the observer give you a grade or a score for your lesson?
7. Does the observer give you points to work on? Think about your last observation. What points did you have to work on?
8. Do you have a follow-up observation to see if you've put the feedback into practice?
9. How useful do you think the observations that you've had have been?
10. What would you do to improve the observations in your school?
11. Have you ever undertaken an observation yourself? Would you like to?
12. Do you do peer observations in your school? If so, what do you think of them, and how do you record what happens?
