CAR FREE DAY

22th September

Purpose of the activity

Car Free Day was a combination of having fun and learning. The activities that took place in school were about coming to understand the short and long-term effects of the continual use of the car and about looking into alternative options to the car – such as public transit, cycling and walking. Also gave the opportunity to learn about, and raise awareness on, the issues of smog and air pollution – and their global counterparts – climate change and global warming.
