

PROJECT TITLE:

“THINK GLOBALLY, ACT LOCALLY!”

Climate Change and Green Energy

Purpose of the study

Students during the erasmus + program were informed of climate change, its causes and the actions we can take to reduce energy consumption. They came in touch with the renewable energy sources and made their own proposals for a cleaner environment with the use of green energy. In the end they copied these suggestions by creating posters and other paintings in order to send their own message.
