

PROJECT TITLE:

“THINK GLOBALLY, ACT LOCALLY!”

Our greenhouse

Purpose of the study

Following on last year's effort to build a greenhouse with hydroponics, this year we managed to operate it. Its function is based on the growth of plants in the water, without the addition of chemical fertilizers. It is currently running with electricity, but in a few months will be installed photovoltaic and so will be based on solar energy.

Planting

The children chose their plants and began to pull the soil out of the roots into the water.

Planting

Each child then got his own flower pot and he placed it on a greenhouse point, which would be his own to look after it and monitor its growth.

Thank you
