

PROJECT TITLE:
“THINK GLOBALLY, ACT LOCALLY!”

World Bird Day

World Bird Day

Birds, accounting for more than 11,000 different species, are found in a wide variety. Every species is unique in appearance and habits. Some species are found in huge numbers while others are very few. Some of them spend their entire lives on a limited area (habitat), while others migrate on an annual basis, literally covering half of the world.

Nowadays, the Hellenic Ornithological Society (a partner of Birdlife International) organizes a series of events in different regions of Greece. They include bird watching, environmental games, and other related activities. This is an opportunity for young and old to live fascinating moments near nature.

The main bird species in Greece

Greece has a variety of bird species, although the populations of the overwhelming majority of species are small. This is mainly due to the small size of the country and the fragmentation of habitats.

The main bird species in Greece

Πουλιά στον υδροβιότοπο

χλάρος

αλκυόνα

αβοκέτα

αρτέμης

καλημάνα

καλαμοκανάς

Endemic birds: Birds that live excluded in an area.

(*Carduelis carduelis*)

Threatened bird species of Greece

Arroyoppelkanos

It is the rarest of the seven species of pelican in the world; it is the second largest bird on the planet.

Threatened bird species of Greece

Kefaloudi

This duck is unusual in appearance and it is very rare for someone to meet her.

Threatened bird species of Greece

Laggona

It lives in wetlands with stagnant or slightly flowing shallow fresh waters and, rarely, in winter, in coastal wetlands. It nests in colonies in reeds or in dense vegetation (trees).

Threatened bird species of Greece

Some of the photos below are from the personal record of a Greek Ornithologist and for that reason we thank him very much.

Thank

The word "Thank" is rendered in a playful, rounded font. Each letter is filled with a different color and decorated with various patterns: 'T' is red with a white vine and blue flowers; 'h' is dark blue with pink and white starbursts; 'a' is teal with a white heart and a smiley face; 'n' is pink with black starbursts; 'k' is red with white diagonal stripes.

you

The word "you" is rendered in a playful, rounded font. Each letter is filled with a different color and decorated with various patterns: 'y' is pink with white diamond shapes and black dots; 'o' is orange with a white flower and red dots; 'u' is teal with black starbursts and white dots.
