

PROJECT TITLE:

“THINK GLOBALLY, ACT LOCALLY!”

Recycling action

Purpose of the activity

During this action, students gathered for a month bottles of plastic, glass and aluminum. Then they visited the Recycling Park, where they delivered the recyclable products. They had the opportunity to discuss with experts about the importance of recycling and why it is so necessary. Then, they recycled their own materials in special machines, separately plastic, aluminum and glass. The money that was gathered, was offered to a charity. In the end, they saw work of art from recyclable materials, and students painted their own works themselves.

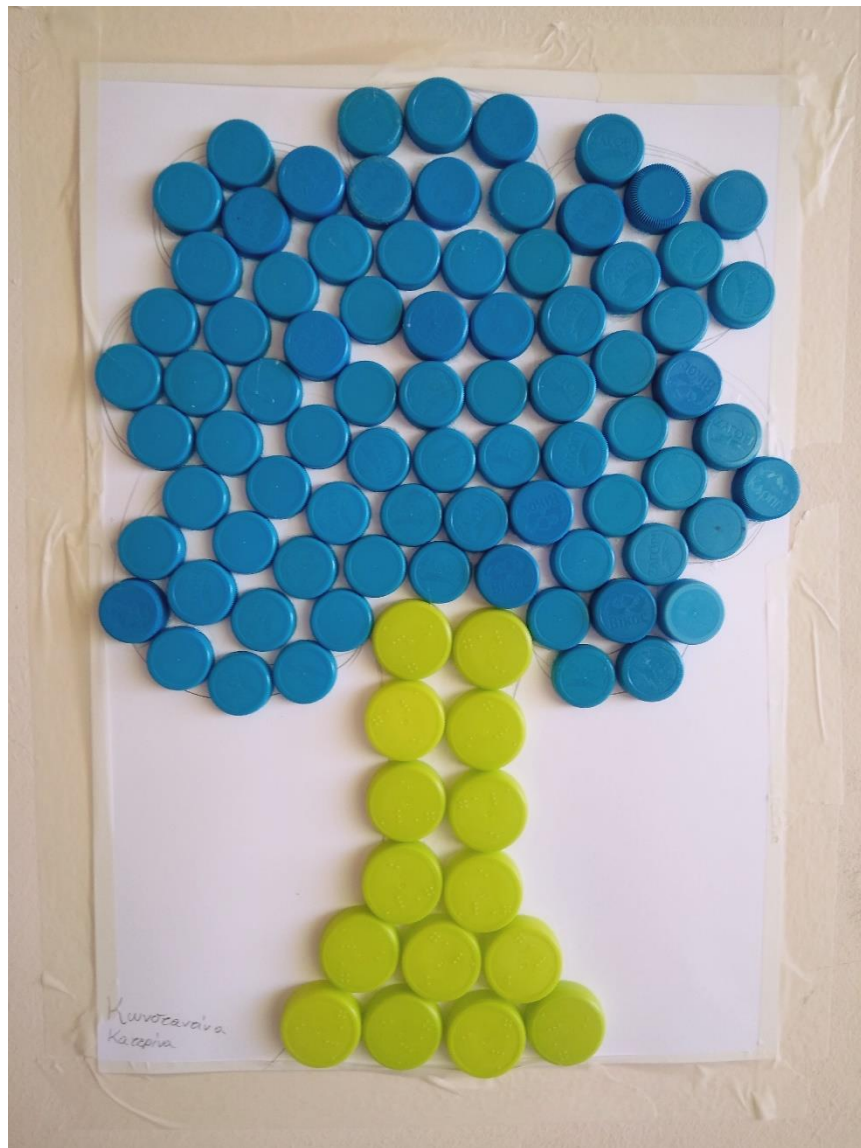

Creating art with lids from recycled bottles

As a follow-up of this action, students gathered the lids from the bottles that they recycled and created various artworks that were placed on the walls of their school.
