

Recycling at our school

Prepared by Manja, Asta and Amina

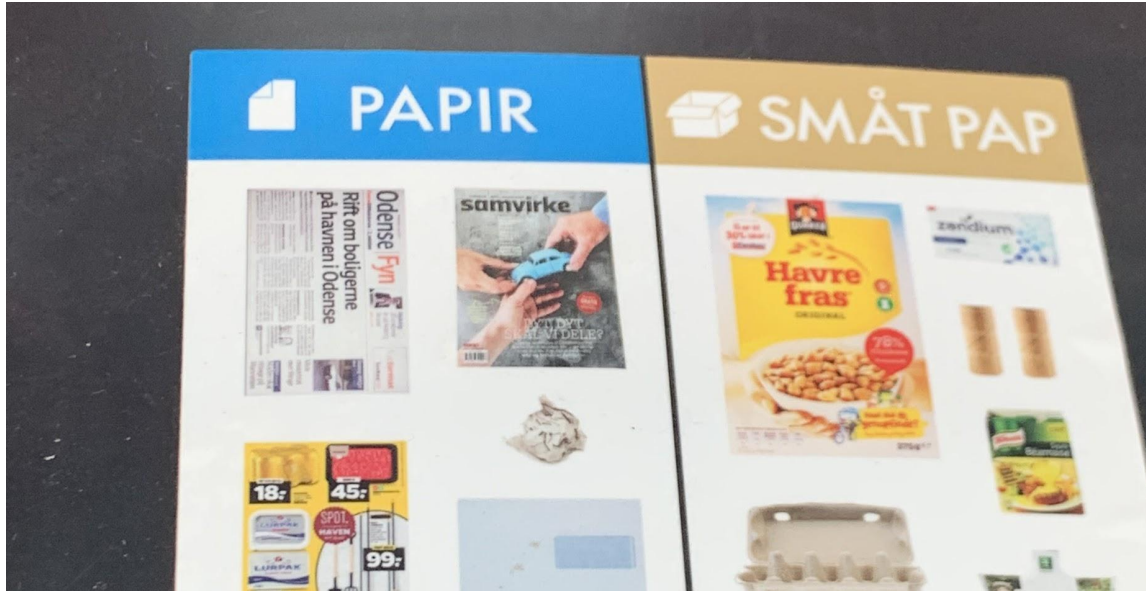

Our trash gathered in a trashcan

In all classrooms we have three trash cans. One for food, one for paper, and one for the rest.

Our trash cans at our school

Trash from all classrooms is gathered in these big trash cans. These big trash cans are then taken to a recycling centre.

Food, snacks and cafeterias at our school

Through our visit at a cafeteria near our school, we discovered that expired products are sold cheaply, so they don't go to waste. This is a good method, because even though the dates are expired by 2-3 days, it can still be sold at a good price. The store owner told us, that products will contain an approx expiration, that depends on which product it is. Also the glass bottles are recycled, after use.

The prices of these products have been reduced because they will expire soon.

20 DKK = 15 DKK
