

Web tools in the eTwinning project Migration
Matters
2017./2019.

During the implementation of the eTwinning project, Migration Matters partners from nine EU countries (Portugal, Spain, France, Germany, Poland, Lithuania, Greece, Italy and Croatia) collaborated and used different web tools to address the issue of migration of people, plants and animals.

Activities conducted by students and teachers during the project, using web tools, motivating participants for better co-operation, stand-alone work and work in groups, active and exploratory learning, contributed to the motivation of students to work on the project.

The tools we used during the project implementation enabled us to better and easier collaborate and create project results.
