1- What did you expect from the meeting in Tarbes? Were your expectations met?10 réponses

Yes

All my expectations were met. The programme fits to the project topic. Further more the activities allowed insights in the culture of France. The programme was very diversified and interesting both for the students as for the teachers. The organisation before and during the meeting was excellent. The final product: creation of e-books was motivating for the students.

All my objectives were filled.

I had no expectations but I was pleasantly surprised at your willingness towards everyone and at the presence of the State on the citizen life

My expectations were met. Congrats to the French team. However, I would have appreciated a better time balance for the day spent in Lourdes. For not religious people it was not interesting to spend so much time in the sanctuary. As a matter of fact I would have appreciated a visit to Pau... but of course this is just a personal preference :)

I was expecting to get to know the culture of the region and find out how it was affected by its proximity to Pyrenees. I wanted to visit a French school and get to know the French scholar system and practices. I wanted to share pedagogical practices with other partners. All these expectations were realized and I am very happy for this! :)

The product made in Tarbes was interesting and preparation for it was very useful.

I expected to know better a French school, the village and the people. The expectations were met, thanks to the wonderful organisation of this meeting.

I didn't expect too much because it was my first meeting. We shared a lot of feelings between teachers and students from different countries. So, I could say my expectations were met actually

2- What could we do to improve future meetings?10 réponses

/

Everything was perfect

Nothing else

Since the hosting country is collecting the participants it should provide a participant list so that we know who is participating (easy index to get to know the names).

Moreover the hosting country should provide a hosting list. So that we know all the names of the students and the addresses / contact info of their hosts.

More sightseeing pls. 3 days on excursion and 2 days in school.

Nothing at the moment

More accurate information in the printed program

To pay more attention to the production of the product.

You could program some more activities at school for students or for students and teachers.

less free time, more activities together hosts and guests students
