

# Students' assessment (Zaprešić meeting) - Report

The Zaprešić meeting was the second meeting in our Erasmus+ KA229 project about New Teaching Methodologies (NTM). After the meeting, we asked all the participating students to complete a Google Form answering questions about several aspects of this mobility.

24 participating students from Belgium, Croatia, Lithuania, Portugal, Spain and Turkey were asked to assess the Zaprešić meeting. They were asked how satisfied they were about the event, the organisation, the activities, and their host families. Furthermore, we asked them about their best and worst experience during the week and some final suggestions to improve our future exchanges. These were the results:

## Overall satisfaction

**92% of the students were very pleased with the event**, with 80% of them giving it a perfect score and another 12% a score of 4/5. Only 2 participants gave the event an average 3/5. This makes an **average of 4.7/5 for overall satisfaction** with the event.

When asked whether this was also a **valuable personal experience**, the results were almost **identical** and to the question: 'Do you think this was a **valuable educational experience?**', 83% answered with 4/5 or 5/5 and only 4 students gave the event a slightly lesser 3/5. This still results in a score of **4.5/5**.

There wasn't a single score below 3, so in general, student satisfaction was very high and there were **no feelings of dissatisfaction** with the Zaprešić mobility.

## Organisation

As for the organisation of the week in Zaprešić and how the students have experienced this, the answers were also very positive.

They particularly appreciated the **welcome and accommodation** provided by the host organisation with an average score of **4.8/5** and not a single student giving those aspects a number below 4.

The **school facilities** and **activities** were scored an average **4.5/5** and **4.4/5** respectively. More detailed remarks about the individual activities can be found below.

In their further comments, the students mainly mentioned the **flawless and friendly organisation** by their hosts and the **good balance between free time and planned activities**.

2 out of the 24 students had a small remark related to the slight **changing of plans** during the week, which they felt was unexpected.

## Activities

A complete overview of every activity that took place during the Zaprešić mobility can be found in the survey, but the following activities were the most or least appreciated of them all.

The **top activities** were clearly the **Plitvice Lakes National Park visit** on number 1 (22 out of the 24 students rated this activity 'Fantastic!'), the **Museum of Illusions** on number 2 and the **Zagreb Time Travel, Bowling** and **Closing Ceremony & Farewell Party** together on number 3. Nearly all the other activities were also much appreciated.

The ones that **scored the least** were the **City Library Workshop** (only - but still - 15 out of the 24 students were enthusiastic about this event; 3 of them found this not interesting at all), followed by **Painting Skylines** (with 'only' 19 enthusiasts and 5 people who were less enthusiastic) and the **eTwining, eCookbook and eMagazine** activity with a similar score.

## Host family

**22 out of the 24 students were very pleased with their host family.** The 2 other students rated this experience a 3/5.
