

Watch English movies

The starting point must be in movies or series that have an easy vocabulary and dialogue. If you have comprehension problems, the solution could be to use subtitles, to be able to follow the thread of the story. Once you practice and notice that your level is increasing, try to skip the subtitles and to retain the maximum of information. Remember that each person has their own accent so your knowledge will be wider.

The listen music technique

The aim group for this technique is everyone that wants to improve his vocabulary in English. You should go to any music platform and listen to any playlist of the type of music you like in English. Then search the lyrics of the song you're playing. Compare the English lyrics with Spanish ones and write down the words you didn't know and his meaning. This will increase your vocabulary.

[w](#)

This technique is useful to improve your vocabulary in a recreative way and you'll discover songs you'll like!

Change the language of the devices your use in your daily life.

Other techniques that you can use to improve your English is changing the language of the device you use daily like your phone, your computer, your e-book etc. This will get you acquainted with some terminology that maybe you are not familiar with and will help you to get fluent in reading and writing.

Flash cards

For this technique we need some cards that we'll put some images on. Then we'll write in the order side of the cards the answer to the question. We will ask any member of our family to ask us the questions and try to say the answer.
