

Summary of meeting, 1st of April 2022, Moss, Norway

We started our last meeting of the week looking forward towards the rest of the visits.

We discussed if we had any ideas for possible changes. What was good? Is there something we would like to see more of, or some things we would like to discuss?

We had several ideas:

- longer days at school
- Learn more about the everyday life at the schools. How is the day planned, what do the teachers do and what do the students do?
- Observe even more education
- Learn about the culture of the different countries
- Liked the practical aspect of the school visits
- Nice to inform about all the schools
- Good to use table placement for the big dinner with all the teachers. The Norwegian teachers were seated next to the teachers from the county they will visit.
- Maybe get the chance to be a part of the teaching in the classroom. To talk to the hosting teacher before the lessons and act as an assistant for him/her.
- It is good to know before the visits, which level you will be teaching. Then it is easier to prepare a appropriate lesson for the students.
- It is good to let the students talk and ask questions to the visiting teachers.

Activities between students from different countries.

	Italy	Spain	Latvia	Czech Republic	Greece
Norway	7th grade from Norway will make a Padlet with short videopresentation of the pupils. 7th grade will make a short film about sustainability, before summer. Postcards after summer.	4.grade, Skype 3.grade, Skype. 2.grade,	7th grade from Norway will make a Padlet with short videopresentation of the pupils. 7th grade will make a short film about sustainability, before summer. Postcards after summer.	7th grade from Norway will make a Padlet with short videopresentation of the pupils. 7th grade will make a short film about sustainability, before summer. Postcards after summer.	3.grade, Skype 4.grade, Skype. 7th grade from Norway will make a Padlet with short videopresentation of the pupils. 7th grade will make a short film about sustainability, before summer. Postcards after summer.

We also want to make a book, a vocabulary of key words.

It will contain words in all the different languages, both written and on audio file. Students from all the countries can make illustrations for the words, and also record the words.

Norway will make the book in the app Book Creator. Everybody will send their contributions to Norway.

The words in the book are:

Hello

Sustainable development

Environment

Cooperation

Changing habits

Renewable energy

Planet earth

Mobility

Pollution

Green house gasses

Emissions

Exhaust

Hope

Love

The topics we want to discuss on future visits are:

In Spain - NGO, a methodology about design for change.

In Latvia - how do they work with coastal areas?

We want to talk more about the formalities in the project concerning media and how to reach out to local newspapers etc.

Furthermore all the partners will share information about some of the methodologies they use in their schools.
