What I found especially good in our meeting:

21 Antworten

Visiting the sights with the whole Erasmus+ Team but also with only the host.

I liked the way the Italian students welcomed us, it was very kind and hearty. The family day was also a good idea because we could spend a day in the Italian families and see the differences between the cultures.

new friends, to learn something about the Italian culture and how the people live there, to learn how to live in another family, to speak the whole day in different languages so our English and Italian is better and we understand more

The friendship that we got with the others

I made new friends

Getting in touch with so many beautiful people :-)

The trips

I found good using a new way of teaching like cooperative learning and project work with my students

organisation, cooperation

Our e-book on Trani's castle

Lo scambio di competenze e conoscenze

Lo studio e le esperienze condivise

The fact that I met interesting people

excursions and activities

The family where I was, was so nice to me. Also the students from the other schools were very friendly. The trip to Castel del Monte was very interesting and also the whole project.

I found especially good the promptness of the communications, which allowed everyone to get organised in time.

The interactive activities and the group projects

People, Federico

That it was good organized

Really nice people and great helpfulness.

that it was diversified

What I missed:

13 Antworten

The communication in a language everybody understood

I know we were a lot of students but it would have been nice if we could have spent at the beginning a day together and not only with our exchange students because I got to know the other students in the last view days and that was displeasing because they were very friendly and I would have loved to know them earlier.

sometimes it was too difficult to understand anything because they`ve talked to much italian for example at the school at the presentation

To stay one week more there... just joking! No I think it was realy good and I didn't miss anything

Most cooperation with my same subject teacher's

more time for workshop

More Free-time to stay in a different contest with the other partners

more aspects about Frederick II'life

Esperienza pienamente positiva

more time to enjoy friends

Activities with both Erasmus groups

Nothing

Nothing it was all great
