What is naturpark?

It is a very large park, where there are different routes in each of which there are bridges hanging, zip lines, nets and much more.

Security

This is the safety material that is used to be on the zip lines and to be more secure.

The harness is attached to a cable that goes from base to base.

Tours

There are different types of tours for different levels.

There is:

The green route is the most basic and simplest level, then comes the orange and blue which is a medium level and finally red and black which is a more difficult level.

These are the bases on the route to stop
