I have four family members including my grandma. In my family, I have myself, my mum, dad, my grandma, and my cat.

About my hobbies. I usually go to basketball training and after that, I usually go home and drive my field car. I used to drive my quad but it broke down and I don't see the point of repairing it so I stuck with my dads' old car. I also like to play with my cat.

And also, I like to play on my PC A LOT.

Me and my family sort the garbage, so that food leftovers go into one bin and plastic, cardboard etc. goes into the other bin. Usually, if we see a bag or some other trash lying around, we try to pick it up.

Me and my family have been building it for many years and we plan to move in this year. My older brother and sister both live in Australia and it's a dream of mine to also move there when I get older.

My hobbies are guitar, drums, motocross and computers. I've played the guitar for around 6 years now and the drums

for around 1-2 years. I also play in a band called Kärbikud where I'm a solo guitarist. Our full band with current members is a year old but we have done auditions before. The drums I play just for fun and I enjoy it as much as the guitar. I've been to a music school for 5 years as well.

I also have a dirtbike and I go to the track sometimes. Recently I haven't driven it but I wanna go and drive it as soon as possible. I'm also a big car guy and I love everything motor, I guess it's from my dad because he has a rallycross car and also is into motors. I have a field car that I drive at my private house, it's an old Subaru Legacy and that's where my love for Subarus came from. I also really enjoy computers and technology. I use my computer to play video games, stream, do youtube videos and sometimes even music. I just recently built my first computer with a friend of mine.

To save the planet me and my family sort our trash, we grow our own vegetables without using chemicals, pick up trash and don't throw trash in the nature ourselves. I try my best to keep my ecological footprint as small as possible.

Thank you for reading about me and my life.
