PUT THE TEXT BACK TOGETHER

Number these lines in the correct order.

()	and full of energy once you get to work, which will improve your performance.
()	delivery and lots more. Without the bicycle, much of the world might stop working!
()	Bicycles are the most common form of transport in the world. There are about one billion worldwide. This makes it the most
(.	1)	Bike-to-Work Day is held every year across North America on the third Friday of May. It was started
()	before. We use bicycles today for recreation, fitness, policing, Olympic competition, mail
()	place of work. Cycling is also much kinder on your pocket. Another benefit of cycling is feeling more creative
()	means there is not so much pressure on the country's health system. Of course, it depends how far you live from your
()	from work. In today's world where global warming is a serious issue, the bicycle is a perfect way of reducing
()	popular invention ever. When we think of some countries, like China, we imagine hundreds of people cycling
()	workers in the streets on their bikes. Bicycles were invented in the 19th century and haven't changed much
()	since. Bicycles now have gears, better brakes and suspension, but the shape is the same as
()	our carbon footprint. Cycling to work is a healthy alternative to driving or taking public transport. A healthier society
()	by the League of American Bicyclists in 1956. Its aim is to promote the bicycle as a serious choice of getting to and
()	everywhere. Even in high-tech Japan, it is impossible not to see businessmen, farmers, mothers or
