

# ***THE STORY OF A SMALL TREE***

There was once a child who  
wanted to better understand  
how life on earth is.  
His parents set out to help him  
discover this mystery.

First, they planted a plum seed together in the garden of their house, which the child cared for daily.

When spring came,  
the seeds became as  
fragile a plant as the  
child caring for it.

Gradually, the plant developed into a tree that his parents told little Tom would be the age of his teenage cousin. The child rejoiced and cared for the tree even more dearly.

When the tree bore fruit, Tom was overjoyed. He guarded the tree until autumn came and the plums ripened

When he bit into the  
sweet fruit, he  
understood the  
meaning of life:  
care, love, patience.

Protect life, protect nature  
and it will reward you as it  
did with little Tom.
