

Rain Rain!

16/10/16

By Dionne

Rabi

Rain is clear like water not blue!

By the way this is true,

Rain makes everything wet,

As if you are dripping with sweat.

Rain comes dripping from the ~~ground~~ sky,

Where all the birds fly,

It makes a pitter patter sound,

That hits a bit hard on the ground.

Don't worry rain gets dry!

From the sun that shines in the sky,

Rain makes giant muddy puddles!

But the shapes of them cause ruddles in your
brain!
