

A VERY BEAUTIFUL EXPERIENCE IN DIFFERENT LANGUAGES!!

I.V, I.E - Olot, Girona

Some teenagers from different nationalities had met and learned more about the fake news.

From the 2nd to the 6th of March the students of “l’Escola Pia d’Olot” have received people from Slovenia and Czech Republic and they’ve participated in an Erasmus about the fake news. During all the week, the students have done different activities in Olot about the city and the volcanoes. They have discovered some new information about the fake news and learned more things about the social networks. On Monday the students of the exchange arrived in Olot. On Tuesday they participated in a gymkhana around the most emblematic locations in the city and then the city hall has made a welcome ceremony for the forestry students. On Wednesday they went to Barcelona where they spend all day. They went to an exhibition about the video games and then, they spend some free time in “la Plaça Catalunya”. Later, they did a guided tour in the oldest part of Barcelona where the

students learned lots of very interesting things. On Thursday they went to “el Museu dels Volcans” where they had a lecture about the volcanoes, the rocks and the different type of eruptions. And finally in the morning of the last day, the Slovenian people and Czech people left from Olot, and they have returned to their houses.
