# 1. Our Erasmus+ teachers

We are going to show you some of our Erasmus+ teachers

By: Carmen y Alexia

# Other Erasmus+ teachers

There are other Erasmus+ teachers like:

- Antonio Javier Alcalá Fernandez teaches economy.
- Santi Rueda Maza teaches french.
- Lourdes Belmonte Sánchez teaches language.

# Our high school

It is opened since 1 October in 1983.

IES Huelin is a public secondary school in the Huelin district of Malaga. It is a bilingual HS so we give a lot of importance to English.

We have some subjects in English such as History ,Physics and Chemistry, Technology and Music .

The school has an Erasmus plan since 2017 , which promotes the importance of recycling, and also carries out some activities such as visiting other schools. It has courses from 1st ESO to 4th grade, and 1st and 2nd of baccalaureate.

It has a vegetable garden , where there are plants such as mint and rocket.

In our school we celebrate all the festivities with games and activities, but because of the covid, we have not been able to do them this year.

# Education

Huelin has several educational centres at different levels:.

- Lucerito" Children's Centre·
- Children's Centre "Gugulandia".
- San Patricio" Private Infant Education Centre
- Diocesan Educational Centre "San Patricio".
- Diocesan School "Virgen del Carmen"
- "Eduardo Ocón" Public School
- Secondary Education Institute "Huelin".

Huelin Secondary School has more than 800 students enrolled in the ESO and Bachillerato levels. It was built in what used to be a rubble area of an old train repair factory called "La Vers", whose name was assigned to the school in the early years, to be definitively named after the neighbourhood in which it is located. It was inaugurated on 1 October 1983.

The neighbourhood has a public library called "María Zambrano", located next to the Huelin market.

# Classes

In our high school there are many classes and departments. The classes are distributed over the three floors of the building. Currently, there are five classes per course on average. Each class can have up to thirty students.

Most classes consist of a whiteboard and a manual. Each one has five windows, which due to the covid, have to be open all day for the ventilation of the classrooms.

By: Claudia and Daniela

# Departments

In our high school there are also departments of practically all subjects like Maths, French, Economy, Language, Biology, Geography, English, History and more.

The departments are there to be able to do better the management of each subject and that each teacher can organize themselves better.

# Other rooms

## ➡ **THE TEACHERS' ROOM.**

The teachers' room is an area where all teachers meet when they call meetings, etc. Here, we can find teachers on duty when we need it, or if we need to call home..

## ➡ **HEAD OF STUDIES.**

At the Head of Studies we solve problems by talking to teachers, and we take measures to avoid further conflicts.

# Other rooms

## ➡ **DIRECTION.**

Here we can find the director when we need him, as well as the secretaries.

## ➡ **CONCIERGE.**

A small room covered with a glass in which we can find the janitors. We also have lost items and if we need we can ask for paper, pins, etc.

# Thanks for watching !!!

We hope you liked our presentation, and...

**THANKS FOR YOUR ATTENTION !**
